Cat Survives 900 Degrees For 36 Hours

Minerva, O., March 9 (AP)—An ordinary calico cat which emerged singed, thirsty but alive after 36 hours in a fiery kiln was an object of scientific interest today.

Dr. William Orr, the veterinarian in this Stark-Carroll county village, exclaimed, "It's a strange case that wouldn't happen again in 100 years. The animal's (foot) pads were burned off, the top of its skull was scorched, the end of its nose was charred and its body was burned as dry as a cracker when it was brought to me."

Dr. Orr pumped food into the baked puss's veins after putting the cat under sedatives. Today it was jumping into his lap to be fed.

The cat was sealed accidentally in a kiln at the Metropolitan Brick Co. plant here Friday night. Temperature in the oven reached up to 900 degrees Fahrenheit. When the kiln was opened Sunday, the durable feline tottered out before the astonished eyes of workers.

The veterinarian said he investigated the case carefully yesterday with plant superintendent Joe Bucola and both agreed that any other explanation was out of the question—the animal had stood the heat for a day and a half and had survived.

Bucola said no part of the kiln could have had a temperature of less than 400 degrees. Workmen doubted if the cat could have found a place cooler than 800 degrees.

"It's fantastic but true," Dr. Orr declared, "I intend to write to the American Veterinary Medical association to find out if here are any records of similar occurrences."

AIR-LINES HEARING

Post Office Favors Salem Service by West Coast, UAL

Washington, March 9 (AP)—A postoffice department attorney said Tuesday the department feels that mail service by the West Coast Airlines company north from Seattle is "useless."

He said the department also sees no need for West Coast service to Klamath Falls, Ore.

Louis J. Doyle, attorney in the solicitor's office of the department, said the department will take that position in civil aeronautics board hearings, to be resumed here March 27.

The hearings are on West Coast's application for permanent authority to serve Pacific coast points and the application of United Air Lines to serve some of the same points.

Doyle said the department wants UAL to continue air mail service to Salem, Ore., and has no objection to West Coast also serving Oregon's capital. At present, West Coast does not serve Salem.

He said the department considers the southern portion of West Coast's routes—from Seattle south into Oregon—is "fairly useful" to the department.

But, Doyle said, the department feels that UAL service at Bellingham, Wash., north of Seattle, is sufficient and that West Coast service to intermediate points as well is not needed.

Oleo Bill on Truman's Desk

Washington, March 9 (AP)—Only President Truman's approval is needed now to repeal all federal taxes on oleomargarine, effective July 1.

Lawmakers generally predicted that Mr. Truman will sign the repeal bill which congress sent to the White house late yesterday.

The senate approved the measure then by a 59 to 20 vote. It passed the house Tuesday, 262 to 106.

Provisions put into the bill by dairy state lawmakers who want to prevent oleomargarine from being passed off as butter call for:

1. The serving of oleomargarine in triangular patties in public eating places—or, signs identifying the product as margarine.
 2. In the case of retail sales, distinct labelling of the outer carton and inner wrapper as containing oleomargarine.
- Senator Wiley (R-Wis) waged a last ditch fight against passage of the bill, just as some house members from dairy states did Tuesday.
