60-SECOND TASTE TEST SHOWS HOW TO...

Be your own whiskey expert!

1. Have 1/4 oz. of Calvert put in one glass and the same amount of any other whiskey in another — without knowing which is which.

2. Sniff one brand for aroma. Taste it critically for smoothness. Swallow carefully to judge its freedom from bite, burn or sting.

3. Taste the other whiskey in the same analytical way — then pick the one that really tastes better to you.

WORDS CAN'T DESCRIBE the big difference in whiskeys... the difference in smoothness, mellowness and freedom from bite. So we say compare Calvert with any other whiskey and let your own taste decide.

We're sure you will prefer Calvert Reserve, because its taste is determined by folks like you who make over 50,000 taste tests a year.

But, after your own test, if you still prefer another brand, stick with it. Fair enough?
