the barometer—of democracy as it is judged from outside, and that most white Americans have no conception of democracy in terms of racial equality. Every publicized case where a member of a minority is discriminated against in employment, housing, and social contact is fuel to the voice of the Kremlin, and is actually subversive, he said; adding "Besides, such discrimination is absurd, inefficient and costly." When a minority group is denied employment or housing, it cannot buy goods as a consumer, or contribute to taxes and charities, and is forced into the slum conditions which produce the social evils—crime, disease and delinquency, the speaker added. Social welfare, police, and hospital costs are then increased, and the very people denied jobs are supported on welfare, paid for by those who refuse to hire them, he said. Mr. Berry feels that residential segregation is the most serious problem in race relations, as it leads to segregated schools, churches, and businesses, and therefore a lack of mutual understanding.
