Stayton Curbs Fire Protection

Stayton—It is not in the interests of a self-supporting fire district to answer calls outside its boundaries and leave property within the district unprotected.

This is the decision reached by the Stayton fire department which will from now on answer only those calls from the city and rural district it serves. This does not in any way affect mutual aid agreements now in effect with other fire departments, cities and rural districts, the department said.

Calls have recently been answered from outside the district, bringing up the question of "fair play" as taxpayers in all areas had equal chance to vote themselves this protection and form rural fire districts. The Lyons area and an area between Jefferson and Marion is presently without such protection.
