

## Public Safety Again Big Issue Before Council

Protection of the public from traffic accidents, including the frequent collision of automobiles with trains again held more attention than anything else at the city council meeting Monday night.

Most of it was on a resolution asking the state speed control board to investigate the possibility of reducing the 35-mile maximum speed along Portland road from Highland avenue to the north city limits.

Alderman David O'Hara got it amended to include North Capitol street from Madison to Highland and Fairgrounds road south of Highland. Mrs. F. A. English, in the audience, got into the discussion and got the council to add Pine street to the investigation for the reason that it is without sidewalks and has become a speedway.

In a separate motion O'Hara had the city traffic safety commission instructed to look into the proper locations for crosswalks on Portland road.

Another resolution was adopted authorizing City Manager J. L. Franzen and City Attorney Chris J. Kowitz to place a complaint with the state public utilities commission that Southern Pacific grade crossing in the city are unsafe and demanding more adequate signals at the crossings.

The rest of the business was sold routine.

One ordinance that was enacted, however, after being put on final passage immediately after introduction, was of more than ordinary interest. It accepted a deed to a strip of property a block long between Commercial and Mason for the widening of Judson street to 50 feet, for which the residents on the street have been after for a long time.

Two other ordinances were enacted. One extends the franchise of the Southern Pacific company another five years to operate a spur track on Ford street. The other changes the sidewalk line on the east side of Laurel avenue between Tamarack and South streets to permit a curb sidewalk.

A bill granting the Southern Pacific company a 10-year franchise to operate across Chemeketa street was tabled. Also tabled was a bill providing council approval for certain driveway applications and for the elimination of unnecessary drive-ways.

New bills introduced were: To vacate parts of 13th and Trade streets and also alleys in Blocks 37 and 38 of University addition that are occupied by the Thomas Kay Woolen mills, a bill merely to clear the records.

A bill establishing a special setback line on the west side of South Winter in front of Lot 3, Block 19, Nob Hill annex, to permit enclosing a porch.

Permitting the installation of a parking area on the parking strip in front of the Carl Construction company at 1675 Fair Oaks Way.

And a bill levying an assessment for sidewalk construction.

A remonstrance against the improvement of North 13th street between D street and East street was sufficient with 51 percent and was referred to the alderman of the ward.

The council thought complaints about outdoor basketball backboards being too close to the sidewalks and curbs should be treated as individual complaints and not as an overall matter for action. It came up in a letter from the traffic safety council.

Petitions for two canitary sewers and the recommendation of City Engineer J. H. Davis on both were approved. One was for Silverton road between Duncan and Abrams. The other was for O'Hara street from South High to East Nob Hill. The engineer's recommendation on both was that they be built when the houses are built.

Petitions for the improvement of Townsend Way from Ford to 23rd, and of East Nob Hill from Judson to McGilchrist, were both sufficient and both were put on the improvement program. The first includes sidewalk construction and the other does not. For the latter the engineer reported the street has sidewalks, although they are not in good condition.

A petition for the improvement of Bush street from Commercial to Saginaw was signed only 46 percent of assessable property and was tabled.

The council granted a request

from Montgomery Ward & Co. for permission to park a large truck in front of the store at 155 North Liberty to demonstrate power tools.

The city manager, the mayor and members of the council were invited by the Marion County Civil Defense to open the inspection of a rescue truck to be on public display March 16 at High and Court.

City Manager Franzen, Fire Chief E. L. Smith and City Engineer Davis were instructed to investigate and report at the next meeting on a request from First Congregational church for certain waivers of the building code in the construction of an addition to the church.

Resetting of parking meters will be necessary on High street between Chemeketa and Union because the council ordered that parallel parking replace head-in parking on the street.

By way of streamlining the city bookkeeping system a modern machine for the purpose is to be installed, and the city manager and city recorder were authorized to buy a National, costing \$5100. However, the Burroughs representative, who had made a bid, said he had another machine he wanted to demonstrate, and it will be examined by city officials Wednesday.

Plans, specifications and estimates were approved for the improvement of Riverview Drive from Kingwood Drive to the west line of Lot 12, Block 3, Kingwood Vista; and for Ferry street from 20th to 21st.

The building in Hollywood occupied by the Tindall pharmacy extends a few feet into North Capitol street, and a resolution was adopted for alterations to change the situation.

A resolution to improve North 13th street from D street to Nebraska was tabled. A resolution to reconstruct a sidewalk along the west side of Fairgrounds road between Winter and Madison was adopted.

A resolution to improve North 13th street from D street to Nebraska was tabled. A resolution to reconstruct a sidewalk along the west side of Fairgrounds road between Winter and Madison was adopted.

## Chinese Woman Not Impressed

Ipoh, Malaya, (AP)—Lee Meng, sullen 25-year-old Chinese woman guerrilla, displayed no emotion whatsoever when told Monday night she had been spared from death on the gallows.

This was reported Tuesday by W. J. Burton, superintendent of Taiping jail.

The gun girl, an accused leader of Red terrorism in Malaya, had been sentenced to death by a British judge for carrying a grenade. The offense is punishable by death under Malaya's state of emergency laws. The sultan changed the sentence to life imprisonment.

Her case was taken up by world communism recently when communist Hungary offered to release an imprisoned British businessman Edgar Sanders, in return for her freedom. The offer was refused by Britain's Prime Minister Churchill.

The council granted a request

**He Won't Tell**—General James A. Van Fleet, retired 8th Army commander, brushes aside questions by reporters as he leaves the White House following 70-minute talk with President Eisenhower. The general said he and the President "talked about friendly old times." Newsmen wanted to know if they discussed the ammunition shortage charges that Van Fleet has been making before Congressional committees. (UP Telephoto)

## Widespread Unrest in Bulgaria Reported

Belgrade, Yugoslavia (AP)—New reports of widespread unrest in neighboring Russian-dominated Bulgaria reached

Yugoslavia today. On the basis of Balkan grapevine accounts from across the border, the Yugoslav newspaper Politika said security measures have been tightened greatly since Stalin's death, particularly in frontier areas.

## Seminarians Will Give Play

Mt. Angel—Mount Angel Seminary students have started rehearsals for their first large stage production since 1950, a three-act play, "The Betrayal" by Geoffrey Dowsett, OMI, which is based on the betrayal and death of Christ.

The play will be presented on two days, the evening of Saturday, March 21, and again the afternoon and evening of Sunday, March 22. Most of the action centers around the two court scenes, the trial before the Sanhedrin following the betrayal by Judas, and the trial before Pilate.

Father Gabriel Morris, OSB, seminary dramatic professor, is being assisted by Douglas Brinkman, formerly with the "Very Little Theatre" in Eugene, in directing this large cast.

Taking the lead is Richard Taylor, a second theologian from Loveland, Colo., as the Christ; Maurice Clemmons, a first philosopher from Billings, Mont., as Pilate; John Malarky, second philosopher from Berkeley, Calif., as Caiaphas; and Dwayne Atcock, second philosopher from Eugene, Ore., as Nicodemus. The seminarians are also making the settings and costumes.

Advance tickets may be obtained at Fisher's Pharmacy in Mt. Angel, or by writing to Bede Annen at the Mt. Angel seminary.

## May Probe Subversive In Religious Groups

Washington (AP)—Some churchmen may eventually be the subject of investigation by the House Un-American Activities Committee, Chairman Velde (R., Ill.), says.

Velde said last night in an MBS radio interview it was "entirely possible" the committee might get into "the church field," but probably not this year because of other business.

He added he could not tell which direction such an investigation might take, "whether it would be into some of the organizations which are affiliated with the various churches, or whether it would be individuals."

## Plenty of Gas On Peace River

Washington (AP)—A chemical engineer estimated Monday the vast Canadian Peace River fields could produce nearly six billion cubic feet of natural gas daily if fully developed.

Donald Katz, a University of Michigan professor, testified at a Power Commission hearing as a consultant for Westcoast Transmission Co., one of five applicants for permits to build pipelines to Washington and Oregon.

Exhibits prepared by Katz following a study of gas reserve estimates and production tests

from some of the 60 existing wells in the 30-million-acre area in Northern Alberta and British Columbia purported to show that plenty of gas would be available to Westcoast.

Earlier witnesses had estimated Peace River reserves to be 2,800,000,000 (trillion) cubic feet. Of that total, Westcoast claims to have purchase contracts covering 2,300,000,000 (trillion) feet.
