Wide Variety Possible Fruit in Home Planting

By MARK M. TAYLOR

In purchasing fruit and trees erally considered to be self-it is well to consult your nurs-fertile or self-pollinizing. Cher-eryman on the advisability of setting out a "pollinizer" or male tree in the orchard in Don't expect immediate assionally this effect can be accomplished by grafting a must be established for some pollenizer onto the pistillate tree, as it is quite often done with holly to insure setting of the berries. Peaches, figs, filberts, cherries and many other duction possibilities of older trees must be watched if fulfile.

destroyed many bees as well appear and treatment from as the harmful insects so science has developed a synthetic pollen purchasable at a seed come to depend upon commerstore that will insure the forcially grown fruits of various mation of fruit.

To correct poor pollination, can tie a flowering branch of the pollinizer in the tree, being sure to keep its stem in water so it will not wilt. Peaches, nectarines and apricots are gen-

order to insure fruiting. Oc- crops in quantity. Some fruits

trees must be watched if fruiting is wanted.

The manner of pollenizing is fruit production. The above one of Nature's oddities! Most often it is the bee that alights on the pollenizer in search of known as "whips" single stalks, hence and set alights on the pollenizer in search of known as "whips" single stalks, hence and set alights of the pollenizer in search of known as "whips" single stalks, hence and set alights of the pollenizer is search honey and gets pollen on its no branches. The root system feet and body, then it lights on is most important and should the pistillate flower leaving be heavy with many feeder some of that pollen on the roots. You may have to trim pistil. This the bees are the the roots slightly when plant-orchardists' best friends and ing to compensate for cutting this explains why so often you back the leader (top) about see beehives scattered through-one-third. If there are many out an orehard. Unfortunate-ly, injudicious use of DDT has be long before branches will

qualities. Surely we could not expect the quality of such # planting a pollinizer tree fruits, often picked before nearby is not practicable, you properly ripened, picked, transported, stored and store-han-dled many times, could be of the delicious quality as thou plucked from the tree or vine Fruit trees are tolerant of most growing conditions except wet drained. Poor soils can be this?-Mrs. V. R. built up by fertilizing, culti-

vating, cover cropping, etc. For appearance's sake, put space is limited, you can even use a fruit tree as an orna-mental specimen in the lawn for it will have beautiful blossoms. For the place that is handicapped for space one can use dwarf fruit trees, that bear earlier and heavier yet take up much less room, or, if de-sired get trees grafted with early, midseason and late va-rieties to extend the fruiting season as long as possible Trees esparliered against a wall or fence are attractive addi-tions to the garden and produce delicious fruit, too.

It is a good idea before pricking around the little roots. It is a good idea before pricking a fine spray to freshen the wilted plants and settle the soil resource the seedlings. Q—Should daffodils be fertilized?—N. L.

ANS—Once a year use a 5-10-5 fertilizer at the rate of 3 lbs. per 100 sq. feet.

Q—What type and quantity of fertilizer is recommended for dahlias?—N. L.

ANS—For dahlias, use a 0-0-20 type fertilizer at the rate of 6 lbs. per sq. feet when preparing the soil.

Q—Can peonies be planted to four feet apart and pills. bunda roses plant from two to four feet apart and pillar

Home Builders Give Guarantee

Of the 270 builders polled of the 270 builders polled by the National Association of Home Builders, 262 reported that they guarantee their homes against defective workmanship or materials for periods gen-erally extending to one year Now all they need to do is install a case and bar atop it like the Eiffel Tower.

The guarantees are in the form of Home Owner Service policies assuring the buyer of the soundness of his new home or other stipulation that the builder stands behind his product. clude a local water district manager, a field engineer, and a health department sanitarian. Rollo Wilson, manager of the Salem Heights Water District, will describe the mechanics of how fluorides are added to the water supply of Salem Heights. Carl A. Carlson, field engineer, for Wallace and Tieran Corporation, will explain fluoridation methods, cost of equipment

The 262 affirmative replies represented a cross-section of large and small volume home builders in 140 cities, covering 39 states and the District of Columbia.

Columbia.

Of the 262 builders who reported that they guarantee their construction, 175 said they accept reaponsibility for their workmanship and materials for one year; one for 18 months; 10 for as long as three years; two for five years; and 12 for an indefinite period of at least one year. Another 51 reported that they give sixmonth guarantees, and 11 said they remedy free of charge any defects for which they can properly be held responsible that show up within three months after the buyer moves into his new home. into his new home.
