Cadillac

Poor Little Hill!

You're looking at a very discouraged hill! Ever since that ribbon of paving outlined it, it has been a challenge to motor cars.

For miles and miles it winds up the side of a mountain; and it has sharp curves, and steep grades that spring out of the curves so a driver can't get a start.

Half-way up, there's a watering place—put there so drivers can stop and refill their radiators.

Yes—it has been quite a hill. But not any more! The driver of the car in the picture above took off at the base and sailed right up to the top—and never gave it a thought.

You see, he's driving a 1953 Cadillac—with its great high compression 210-horsepower engine—and its vastly improved Hydra-Matic Drive.

We heard recently of two men who drove from Florida to Detroit—in a 1953 Cadillac.

The driver had made this trip before—and as they left Knoxville he said to his passenger: "Man, are we going to find a hill between here and Lexington!"

After an hour or so, the passenger said: "Where is the hill?" And the driver said: "Just wait!" So they waited—and presently they saw a sign which read: "Lexington." The driver was dumbfounded. "I can't understand it!" he said. "There used to be a hill there—a big one! I know from experience."

Naturally, this great car gives you more than the ability to master hills.

When you float along with a tremendous reserve like this, you have the easiest ride imaginable.

It gives you confidence, too—and helps you to relax—for you know you have the power for any emergency that may arise.

It makes the whole car a symphony in motion. In fact, the ride is so smooth and soothing that, not infrequently, passengers sleep as they ride.

Come in and try it for yourself. The car is waiting—and it's an experience you ought not to forego.
