

TELE-VIEWS

Radio-Television
By DAVE BLACKMER

This contest between the motion picture industry and the television industry is getting quite interesting... Movie industry offers three-dimensional movies to combat fast moving television... Now the television industry is tinkering with three-dimensional television. The first experimental demonstration took place Wednesday, April 29, in the Biltmore Hotel in Los Angeles. The system requires use of polarized light glasses and a specially designed TV receiver. Special approval from the FCC was authorized for the experiment.

The demonstration is merely a means of showing one method of possible 3-D television transmission and should not be regarded as final or conclusive for home tele-viewers.

Of course this is nothing to get excited about as this will follow color TV and color is far in the distance yet...

BULLY FOR A WOULD-BE MATADOR

Dressed in street clothes, Juanito Portillo raises cape above the horns of a fierce bull as he thrills crowd at the fair in Seville, Spain. The would-be matador made his bid for stardom by jumping into the arena to do his stuff and put up such a good show that the crowd cheered him on and on. Since it's against the law to do such things, Juanito was arrested as he walked out of the ring unhurt but said he didn't care because he's sure of a job as an apprentice bullfighter. (AP Wirephoto)

Britain's Crack Wheat Grower

New York (AP)—The champion wheat grower of Britain, J. M. Dick Turrell, who farms 220 acres in Lincolnshire, has arrived here on his way to see how they grow wheat in Oklahoma.

Turrell, accompanied by neighboring farmer, will visit Robert J. French who annually harvests 2,000 acres of wheat on a large farm near Boise City, Okla. They arrived on the Cunard liner Queen Mary.

Last year Turrell and his brothers produced a world record yield of 125 bushels per acre on their farm near Norfolk. They planted 70 acres in wheat, but the big yield came mainly from nine especially productive acres, he said.

Turrell credited his success to "a good piece of land, perfect seed and ideal growing conditions in the weather point of view."

But he does not expect to repeat the performance this year. The wheat bulb fly is damaging crops in his section of the country, he explained. Unless farm experts learn to control the pest, farmers in the area may have to stop growing wheat, he said.

Reading Certificates to 1128 Boys, Girls

Reading certificates were issued to 1128 boys and girls of the Salem public schools, by Mrs. Arthur Roloff, children's librarian at the Salem Public Library, Wednesday.

The reading program, which is for Grades 3 through 6, is carried on each year in cooperation with the Salem public schools.

Boys and girls must read a required number of books from a list that is prepared by the library in order to receive a certificate.

Eugene Marsh in Role Of Oregon Governor

Mrs. Verle Klampe was the honored guest for a shower party Monday night at the home of Mrs. Leonard Odum on Tierra Dr. Spring flowers in many appropriate vases were the theme of the party and even on refreshments and favors were used. Gifts were from all members of the Swegle Community Builders.

The April meeting of the T.P.M. club was held Sunday night at the home of Mr. and Mrs. John Versteeg on Ward Dr. A supper was served and a social evening of cards and games followed. Present were Mr. and Mrs. Walter Bradley, Mr. and Mrs. E. E. Brandt, Mr. and Mrs. Louis Neuman and their week-end house guests, Mr. and Mrs. William Olson of Beaverton; Mr. and Mrs. John Heppner, Mr. and Mrs. Ralph Hein, Mrs. Charles Bottorff, Mrs. Lula Wilson, Mr. and Mrs. George Beane and Julian, Mr. and Mrs. William Hartley and the hosts.

WALKOUT ENDS

Portland (AP)—Eighty Western Electric equipment installers who had walked off the job here Monday to protest what they said were delays in wage negotiations in New York City, returned to work Tuesday.

The "song" of the cicada is produced by two drumhead-like membranes in its abdomen.

Probe Bureau Of Standards

Washington (AP)—A committee of scientists Wednesday began a study of the National Bureau of Standards at the request of Secretary of Commerce Weeks who asked a thorough, objective and impartial examination of its operations.

The nine-man committee, whose members were appointed by various scientific organizations, met in Weeks' office. The committee is headed by Dr. M. J. Kelly of Bell Telephone Laboratories, representing the National Academy of Sciences.

Weeks announced on April 3 he had asked Dr. Detlev W. Bronk, president of Johns Hopkins University and president of the National Academy of Sciences, to organize the committee "to evaluate the present functions and operations of the National Bureau of Standards in relation to the present national needs."

Lincoln

Lincoln—One hundred dollars was netted for the Lincoln Community Center association building fund, at the benefit show Saturday night.

Mrs. J. S. Smart was accompanist throughout the entire program.

Russel Hicks and Jim Brudon were masters of ceremonies. Kenneth Noteboom, president of Spring Valley Farmers' union junior unit, and Ruth Suismich were the committee on arrangements for the program presented by the junior group, and Mrs. Lloyd Dickenson was their leader.

Eddie Wolff called numbers for square dancing and arranged for dance music.

Other program numbers were arranged by Mrs. Robert Shepard, Mrs. Russel Hicks, Mrs. Lloyd Dickenson, Mrs. Harold Washburn, Mrs. Lloyd Hoxie, Mrs. J. S. Smart, Mrs. W. D. How we helped our neighbors build the Golden Empire

First transcontinental railroad

It all began on May 10, 1869, with the driving of the Gold Spike, which literally bound the United States together with enduring steel. The Central Pacific (now Southern Pacific) had joined with Union Pacific to speed westward the course of empire in America. We are indeed proud to have been part of that exciting history.

Bringing settlers, tourists

Beginning early in that pioneer period, we stimulated population by advertising, by sending lecturers throughout the U.S. and Europe, by special colonist trains and very low "homeseekers' fares." Today the population of our eight S.P. states (see map) is more than 25,000,000 and is increasing three times as fast as that of the rest of the U. S.

We pioneered in advertising the tourist attractions of the Golden Empire, too, aiding communities and areas in

luring visitors. Today the tourist industry usually ranks third to fifth in importance in Golden Empire states. Visitors stream to our National Parks, exciting cities, mountains, seashore and deserts.

Reaching new resources, farmlands

Tremendous and diversified resources have been developed in our territory, aided by the effective transportation service we provide.

The Golden Empire produces 38% of all U. S. lumber... 71% of the petroleum... 86% of the copper... 56% of the gold... 100% of the crude sulphur... 32% of the fisheries... 42% of the silver... 44% of all minerals... 24% of the salt... 63% of the natural gas... 27% of the lead. And, continually, since 1869, new and more diversified farm acreages have developed along S.P. lines. Today the Golden Empire produces on its 318 million farm acres 53% of all U. S. cotton... 29% of the sugar beets... 77% of the melons... 77% of the rice... 87% of the lettuce... 44% of the citrus fruit... 81% of the nuts... 93% of the grapes.

Locating new industries

For 84 years we've sung the praises of our Golden Empire for industrial purposes, inviting Eastern industries to locate along our lines, where abundant resources, agriculture, efficient manpower and benign climate favor them.

And how they've come! For the past 26 years more than one new industry per day, requiring spur track facilities, has located on S.P. Lines—and now the average is two a day.

Paying our way

The great bulk of our S.P. Transportation System revenues goes back into Golden Empire prosperity.

The \$341,000,000 we paid in wages to S.P. men and women last year helps our territory. In 1952 we paid more than \$85,000,000 in taxes to local, state and Federal governments.

We pay our way, operating without any public subsidy.

Our continuing purpose is to keep pace with our Golden Empire, expanding with it, and helping to provide the fine transportation it needs to develop and progress.
