Summer Living Use Simple Approach in Housework

(AP Newsfeature)

Your summer design for living should be the simple approach. Tried and tested tricks for cutting down housekeeping should appeal to any housewife. Here are some pointers well worth considering:

1. Protect your living room curtains by backing them with clear plastic shower curtains. The shower curtains may be attached easily with shower hooks to screen draperies from dust and sudden rainstorms.
2. Tack plastic film over upholstered seats of your dining room chairs. You can keep the plastic covers fresh with soap and water during the hot months and upholstery should be clean and bright when you remove the covers in the fall.
3. Make cool-looking white turkish toweling slipcovers to protect your fine upholstery. They're not only handsome but can go right into the washing machine and need no ironing.
4. If you want cool, temporary slipcovers on a broiling day, just tuck fresh white

sheets over chairs and sofa.

5. If you want to store draperies from effects of the elements and a dusty house, consider using sheets at the windows during the summer months. These are ideal for certain type windows, can be adjusted temporarily to windows and used as sheets again when removed.
