Rail Express Rates Raised

Washington (AP)—The Interstate Commerce Commission Wednesday authorized the Railway Express Agency to increase its rates an average of 15 per cent. The rise is expected to bring the agency about \$55 million dollars a year.

The Express Agency had asked an average increase of about 23.5 per cent. The commission based its estimate of \$55 million additional revenue on the assumption that there will be no loss of volume.

In scaling down the request for higher rates, the ICC said an increase of 15 per cent substantially equals the average increase in railway wages

The committee was originally appointed to carry out recommendations of the President's conference on children and youth.
