THE RAINBOWS THAT COME IN CANS

Remember the last time you took a can of paint and stirred it up with a little imagination and some brushwork?

We'll bet it gave you a different slant on life, whether it brightened a part of your house or gave a child's toy a colorful look.

To help make your life brighter—and easier—today's paints come in every tint and hue of the rainbow. Best of all, the modern miracle paints come to you ready to use.

America's paint industry and the American Can Company virtually grew up together.

The paint companies worked out formulas for ready-mixed paints that do just about any special job you have in mind. Meanwhile, Canco developed practical leak-proof containers, with their now familiar "double-clinch" covers, to keep

paint fresh during shipping and storage, until you are ready to use it.

New plants and whole new industries were able to get started when Canco developed the right container for ready-mixed paints. This meant new and better jobs, and a higher level of prosperity for us all.

Yes, by making better cans—not only for paints but for just about everything you can think of—Canco has been able to help all Americans eat better, live better and work better.

We can be proud of such teamwork between our people and our business enterprises. That's what makes America such a satisfying country to live and work in. And it promises a future—"bright as paint"—for us all.
