

Enlightening Address by Canadian Broadcaster

Mt. Angel Schedules Sacred Art Exhibit

Mt. Angel—A public exhibition of sacred vessels, vestments and small altar crucifixes to be sponsored by Mt. Angel Seminary is being announced by the Very Rev. Bernard Sander, O.B.S., seminary rector.

The exhibition will be on public view for three days, February 4, 5 and 6, and will be accompanied by talks scheduled each afternoon by William Justema, an artist who has been active at the Abbey and Seminary for three years, and is now art director for St. Joseph's Magazine.

Artists are invited to submit photographs or sketches of work on hand, or being done, in the three fields of chalices, chasubles and the crucifix. These are the art objects with which the exhibit will deal.

Artists are asked to submit photographs or sketches to a selection committee consisting of the Very Rev. Martin Pollard, OSB, prior of Mount Angel Abbey; Rev. Gabriel Morris, OSB, of the Abbey's art and dramatics departments; Rev. John Domin, art teacher at Central Catholic high school in Portland; Henry Ellis, liturgical art scholar; and William Justema. As the entire exhibit will be made up of carefully selected "invited" works chosen from the photographs and sketches submitted, these should be sent to William Justema not later than Jan. 1.

Canada, just coming into its own as a producer of strategic raw materials was termed "the country in between" — USA on the south and the USSR on the north. However, Fisher touched but little upon the political aspects of his country.

The land to the north which is as high as it is wide and stretches across seven time zones, with a population of little more than 14 million was divided into three corridors by the speaker. The corridor immediately north of the U. S. border is little different physically or from an ethnological standpoint, Fisher said.

The second corridor, where vast quantities of mineral wealth lie beneath the covering of tundra or muskog is of particular importance to the United States with its vast industrial strength, Fisher pointed out.

The top corridor, where "climate is made" and beyond where Russia keeps a watchful and suspicious eye was termed a region of undetermined potentialities. Only time will tell what may develop there, in the Canadian's opinion.

Fisher spoke of the nickel, the vast iron ore fields, asbestos, titanium (the miracle metal), platinum, cobalt and the uranium which is so vital to the powering of the atom bomb. The pre-Cambrian shield of the middle corridor, said Fisher, was a great storehouse of such strategic metal.

The speaker described the border between the U. S. and Canada as the sole dividing line of this nature that doesn't have an underground.

Answering a question from the audience Fisher asked that the two countries maintain friendly relations as neighbors should but suggested that they handle their own political affairs on a separate basis.

A humorous sidelight to Fisher's talk was his description of an incident in Canada when Prime Minister Winston Churchill found nothing but a pitcher of ice water in front of him during a speaking engagement. Able to imitate Churchill's peculiarities of speech, Fisher brought a roar of laughter from his audience.

Salem 43 Years Ago

BY BEN MAXWELL
November 12, 1910

A petition had been presented to the Alaska Steamship company protesting the action of Captain John Johnson, master of the Alameda, in putting ashore a boy stowaway on bleak San Juan Island without food or shelter.

The A. C. Bohrnsteadt company, Salem, had representation for the Waldo Hills Orchard company, a 950 acre horticultural development in the Waldo hills.

No provision had been made for paying ministers for their services at the asylum for the insane. Secretary of state had classified the services as "amusement expenses" and as such it was paid for.

Commercial interests in the Willamette valley were said to favor purchase and improvement of the present locks at Oregon City rather than development of a new system on the east side of the river.

A cherry tree 51 years old continued in heavy production on the Martin farm northeast of Monroe. The tree was 12 feet in circumference.

Roth Grocery company had Sealshipt oysters, "most sanitary oyster in the American market" for \$1.00 a quart without liquid and imported Camembert cheese in tins for 40c.

Farmers Cider and Vinegar works on Commercial street had an offer of \$7 to \$8 a ton for apples in the sack, delivered to their plant.

Howard Pyle, 58, distinguished American artist, had died.

August Huckenstein manufactured La Corona, a 10c cigar; Tashmoo, a 12 1/2c smoke and Bon Ton, a good nickel cigar.

One of the largest single blocks of marble in the United States is incorporated in the Tomb of the Unknown Soldier in Washington, D. C.

Building Boom To Continue

Los Angeles (AP)—Undersecretary of Commerce Walter Williams said Friday that "another boom year for building" is indicated for 1954.

"Activity in all types of construction is expected to maintain expenditures at close to the record volume of .933," he declared in a talk prepared for the closing convention session of the National Assn. of Real Estate Boards.

Whereas the 1953 record dollar volume of construction is nearly 35 billion dollars, the 1954 new construction dollar volume should reach 34 billion, he said.

New Zoning in Effect Today

Salem's new zoning code became effective Friday, and maps showing the various classifications will soon be available to the public.

As against only a few residential, business and industrial zones under the old code the new one has no less than 18, counting all the special ones. They are: R 1, single family dwellings; R 2, multiple family district; R 3, apartment houses, hotels, etc.; R 4, restricted residential.

G 1, public buildings; C 1, neighborhood business; C 2, restricted business district; C 3, general business district; C 4, central business district; M 1, light industrial uses; M 2, all industrial uses; P 1, parks and playgrounds; P 2, schools; P 3, municipal and government; P 4, cemeteries; P 5, fairgrounds; P 6, institutional buildings; P 7, municipal housing.
