Much Wanted Endres Held in Montana

Albany — Leland B. Endres, an Albany youth sought on three counts by the sheriff's office here, has been apprehended by Butte, Mont., police. Linn County Sheriff George Miller said this morning. The sheriff said that the 18-year-old Endres is charged with obtaining money under false pretenses, burglary not in a dwelling and assault with a deadly weapon. Bail of \$100 was set by district court here on each of the other two, according to Sheriff Miller.

Nevertheless it is not yet certain that Endres will be returned to Albany to face the charges. The sheriff explained that the youth also is wanted by California and Nevada authorities on bad check charges, that the FBI holds a warrant for his arrest and that he is under indictment in Lincoln county.

Jaycees Urged to Broaden Program

Albany — While citing some Jaycee organizations for excellence in carrying out community service programs, Don Reitzer, Salem, national director for the United States Junior Chamber of Commerce, Wednesday urged Jaycees everywhere to "re-dedicate themselves to the creed and principles upon which the organization was founded."

The director said too many clubs have failed to live up to the creed, and have failed to carry out national and local programs. He complimented Albany Jaycees on their activities, however, but asked that they engage in still more national programs.

Why the Golden Empire's future is bright...

It's no wonder the eight states of the Golden Empire look to the future with such confidence. And that includes us, too.

For these states—all served by S.P. (see map)—are so richly diversified in their manufacturing, mining and agriculture, that each activity acts as a cushion for the others, smoothing out the ups and downs that could otherwise dislocate the economy of the area.

Thus, the area as a whole continues on a steady upgrade. Let's look at some of the reasons for our confidence:

In the first place, there are more than 32,000 different firms doing a tremendous variety of manufacturing in these eight states. Next, add the area's greatly diversified \$3,479,167,000-a-year agricultural industry which covers everything from avocados to zucchini.

On top of that is the Golden Empire's huge supply of raw materials, great natural resources and the industries they create—mining, mineral and chemical production, lumbering, etc.

Now let's look at population growth and its significance. In 1940 there were 18,467,411 people in the Golden Empire. In 1950 this population had grown to 24,781,993—and it's still going strong. Department of Census predicts a population of about 32,450,000 by 1960.

This means an increasingly large and important market for goods—and, perhaps more important, a greatly expanding and permanent labor pool for the additional new industries that are coming.

So naturally S.P. looks to the future with confidence. One significant proof is this: Since the war a total of \$646,000,000 has been invested in the newest and most efficient equipment and facilities—further evidence of our continuing determination to give the Golden Empire the finest transportation in America.

Southern Pacific Golden Empire

Here's what happens when new industries locate on S.P. lines

An average of two more industries, requiring spur track facilities, have been locating on S.P.'s lines every day—that's 14 new ones a week. Now, Government studies show that an average industry employing 50 people supports 300 to 400 people.

Of course, not all the firms locating on S.P. lines conform to this average, but we think it's a reasonable yardstick to use.

So here's a picture (based on Government studies) of what this added activity does for business in one short week:

14 MORE INDUSTRIES PER WEEK	NEED FOR 4,300 PEOPLE
SUPPORT OF 1,400 AUTOS	1,000 HOMES
WITH \$1,450,000 IN SALES	140 STORES
A TAX FOUNDATION OF \$11,000,000
