HOUSE BUYING PROSPECTS

The National Association of Home Builders, the Society of Real Estate Appraisers, building and mortgage firms seem to agree that prospects for buying new homes will remain about the same as at present, for used houses much better, but that financing and mortgage availability differ regionally.

A shortage of mortgage money exists in some regions in the far west and south, but the crisis is easing. And proposals are afoot to remedy the shortage both in bank-

ing and legislative circles within the year.

Although there's been a slight drop in home building, most forecasts are that we'll keep on building houses near the whopping rate of about a million a year. Recession talk is fading. But the supply generally continues

good.

While pressure for price boosts is being generated by rising costs of labor and land improvement, this is countered by growing competition among builders. So new tered by growing tasaly and the competition makes home prices are mainly steady and the competition makes for better quality.

While new home prices are firm, the prices of prewar homes have dropped 5 to 10 per cent, according to a re-port on 12 cities throughout the nation. Many owners of newer than prewar houses have slashed their prices, sometimes up to 20 per cent. The general prediction is that used house bargains will be plentiful.

The trend is toward building larger and costlier houses. A reaction from postwar buying of small homes by G.I.s and others who now have bigger families and higher incomes. They have outgrown their dwellings, which are on the market for newlyweds.

Buying of houses, new or old, will be a little easier after the first of the year because of the 10 per cent income tax cut, which will go into effect for 1954, affecting 50 million taxpayers.—G. P.

NO PAROLE FOR ALGER HISS

The country will applaud the decision of the U.S. Parole Board not to parole Alger Hiss, now serving a prison term for perjury.

There were two views the board could take on the Hiss case. It could go by the official record alone. He is doing time for lying under oath, a serious offense, but not one that ranks with murder or armed assault. He has served the usual time for this offense and would be qualified in the ordinary course of events for release.

What the board evidently did do was to consider the further fact that while Hiss was technically convicted of perjury the actual offense was treason for which he could not be prosecuted because the act itself had been outlawed by the running of the statute of limitations. And whatever sentence was imposed for perjury would be an extremely light penalty for what Hiss did. Therefore he should serve every day of his sentence and be thankful that this was so much less than he deserved.

It seems clear that an agency like a parole board is entitled to consider and rule on the basis of the known facts and not be bound to the official record. The official record might make Russia look like a neutral in Korea but the facts certainly don't, to offer an illustration of what we

THE LOCAL LIVESTOCK SALES YARD

One of the significant trends in the livestock business has been the growth of local sales yards at key points throughout the western livestock country. Formerly the stock was sold on distant big city markets. Now it is likely to be sold to packers or feeders close to the ranch where it is grown.

The foregoing observation is prompted by a news story in the Ontario Argus-Observer to the effect that the Ontario Livestock Commission sales yard there sold 3160

15-year history of the yard. Eight thousand four hundred were sold at the yard in three consecutive weeks.

Ontario is probably the largest yard in the eastern part of the state, but by no means the only one. Thirty-seven miles further east, at Caldwell, Idaho, there is another of comparable size.

These sales are held one day each week. They bring in hundreds of sellers and buyers, giving the grower a cash market close enough to home so he can withdraw his stock without serious loss if he is not satisfied with the price. The trend toward leaves the settle ambassador, officially to settle the duestion of Arab refugees, but to settle the broader at a to settle the broader at and more basic problem of Arab-Israel friendship.

What Johnston took with him was a comprehensive him was a comprehensive him was a comprehensive which is responsible for making the prime minister, which is responsible for making the prime minister.

"No, it's not our problem."

Countered Johnston. "On the party platform, rejecting this choice for vice president, and more basic problem of plant to allow him to sabotage the party platform, rejecting the prime minister.

These sales are held one day each week. They bring in hundreds of sellers and more basic problem of plant to settle the broader which is responsible for making the price. The trend toward local sales yards is a helpful one to the producer, and the buyer finds it handy, too. It has become "big business" in the cattle country.

NO DEATH CELL WEDDING

The average person might ask "what possible objection can there be if Carl Austin Hall and Bonnie Brown Heady want to be married in the death house of the Missouri penitentiary prior to their execution, scheduled for Dec-

This was our initial reaction, but on second thought we think the prison officials are right. There is a sanctity to marriage for which this couple are hardly qualified. Theirs has not been a union either church or state can wish to bless

Congratulations, rice, wedding cake and general good will go with the marriage ceremony. None of this can be felt or properly expressed here. Better to let the law take its course with as little sentimentality, maudlin or otherwise, as possible.

ROSE BOWL CHOICES

There will be little dissent over the Rose Bowl selections.

Michigan State is probably the strongest team in the Big Ten, certainly the most colorful, and this team will have the advantage of novelty, not having played there

Ucla is not a colorful team, but one that wins its games, which is the acid test of strength. The far west, beaten in all but one of its encounters with the Big Ten teams cannot afford to present less than its best. Even if Stan-

ford does have more color.

Morse's Speech By Charles V. Stanton

I was in the audience at the

High School auditorium Friday night to hear Sen-ator Wayne Morse talk about Senator Wayne Morse.

The senator's speaking ability never falls to elicit my hear him I sit enthralled by his marvelous command of language, his clear enunciation, his voice modulation, the effortless gesture, the tone of conviction, the biting satire, the peerless showmanship, the change of pace and perfect timing.

To one who sweats and strains through every public ufferance, trembling with fear at the very thought of facing an audience, the sens-tor's talent seems nothing delay action. short of perfection. At oratory

A third que he has few peers. But, then, he gets a lot of practice.

argued, cooperation on Jordan valley authority ates words, I almost missed Listening to the symphony the senator's implication that of the 531 members of The Congress, 530 are party hacks, "The American people have numbskulls, dupes and or sto-been spending \$150,000,000 a oges, and that only one knows year on this area." Johnston told Arab Prime Minister Faw-told Arab Prime Minister Faw-are executive branch of governzi Mulqui of Jordan. "And ment, picked from some of they're not going to do it much the most successful and highthe most successful and highlonger. If you don't go along
with this project, you'll find
yourself handling these refugees at a cost of \$80,000,000
a year."

In most successful and highties most successful and highincompared to a nothing constructive and is wrong on all decistions and policies.

Under the spell of his mag-

der a system similar to the Tennessee Vally. If this ir "Don't make any mistake done him dirt, and the recital about future money from the put across, he told the Arabs United States," Johnston conmustering courage to be a put across, he told the Arabs and Israelis, the Jordan valley could be made to bloom like a rose, and permanent peace and prosperity would Arab refugees. And he isn't prevail in the Near East, Arab refugees could be put to work them much longer.

On the other hand, if you after that the other hand, if you across this Jordan Valley gance, waste, inefficiency and project it will not only bloom graft originated with the second continue of the side of Arab-largeli relations. the side of Arab-Israeli rela-as never before, but every re-tions. onomic do-good-ers of the administration to which the sen-Johnston reported to Eisenator had consistently given his ator nad consistently given his allegiance in many past years. Also the thought that the sen-ator's sudden passion for ec-onomy, completely lacking in in Israel. Bitterness over re-cent border incidents is in-tense. Both countries are a long way from being con-vinced. In Lebanon and Syria his prior record, existed only long enough to serve as an alibi, as evidenceed by his

ful flow of dulect words, plously disclaiming ill will against his detractors, and the crime-does-not-pay denuncia-tion of vengeance, was the Wisconsin Democrats have launched a "contest" to guess harsh undertone of jealous the date on which Agriculture Secretary Benson will resign. It's a straight political gim-mick of course, but it's catchmer Governor of Oregon, now serving as Secretary of Inter-ior, to whom the senator ating on like wildfire throughout the state. tributes all things evil.

Every person who comes chords in the symphony of This game should be fully up to the established tradition.

Johnston reported that at first he was met with hostility from both sides. The Arab press claimed his mother and father were Jewish, that he had changed his name. The lestifid in Superior Court that a bright blue line, her food is kept on the right, his on the had become "impossis left."

OPEN FORUM Mesh Production and Consumption, His Plea

To the Editor: Security of living is the goal of every one living. It is the incentive that drives our activities in mental, physical, and

social efforts.
Senator Morse mentioned the fact that stored food soon spoils and is not fit for human use, which is true. He presented no solution. In 1948 Oscar Ewing reported to the president that every day in the U.S., 900 people died from slow starvation, not enough food to maintain physical health. He mentioned that industries are slowing down, making short week payments that reduce wages for workers. That farmers were producing surplus crops that had to be stored. That workers could not purchase the farmers' prosenator has given his support, lo these many years, took office. Take a gander at the list ducts and farmers could not of newspapers forced to fold financially in the past few making the conditions suitable for depression; that the intersects of workers and farmers were contributory to each other's welfare.

All true, but he made no proposals as to how the farmers could dispose of his surplus food when the workers were unable to purchase for lack of money. True some of them get high wages while working, but he did not mention there are 100,000,000 people in this country who receive less than \$2,000 a year, one-half of them less than \$1,000 (government figures). That it takes \$3500 to secure a healthy standard of living, according to U.S. health figures. These are prob-

tures. Laws are force, that take all the bad names ever known, and spontaneously ynvented citl opportunities. There can be new and more terryble oaths upon the stock. no freedom of action without upon the spot. financial security.
