

### Farm Prices Drop Slightly

Washington (AP)—The agriculture department reported Monday that farm prices as a whole decreased two-fifths of one per cent in the month ended Nov. 15.

This was the four consecutive month that prices received by farmers for their crops and livestock went down. By comparison, farm prices are 9.72 per cent below a year ago and 20.4 per cent below the record set in February, 1951.

Commodities which declined during the month included hogs, eggs and cotton. Products which increased were milk, wheat and several commercial vegetables.

Prices paid by farmers for goods and services used in family living and in production increased one-third of one per cent in the month.

With the decline, the level of farm prices in mid-November dropped to 90 per cent of parity, the lowest since May, 1941.

### Briefs Filed on Segregation

Washington (AP)—Kansas and South Carolina contended to the Supreme Court Monday that the federal courts lack power to outlaw racial segregation in the public schools.

Both states filed briefs preliminary to oral argument before the high tribunal next week of a series of cases attacking segregation of Negro and white pupils. Pending before the court are cases from Virginia, Delaware, Kansas, South Carolina and the District of Columbia.

The cases attack segregation on the grounds that it violates the 14th Amendment.

South Carolina and Kansas argued on the other hand that the 14th Amendment was not intended to end segregation.

The Kansas brief said it was the intent of the framers of the 14th Amendment that the management of public schools should be left to the state legislatures.
