FINANCIAL WEAKNESS OF THE CHAMBER

Chamber of Commerce directors are doing some soul searching in the wake of a frank report on the local ornization by Ben Lawsche of San Francisco, a veteran U.S. Chamber man who made a survey of it a few weeks

This report, baring a number of admitted and some other alleged weaknesses, reached the board members along with a financial report that shows the Chamber running steadily behind and virtually without a cash balance. Not all its bills are paid either. Retiring President Russel Pratt left recommendations

that the Chamber slash expenses drastically by reducing the four member staff to two in order to pay off indebt-edness and build a cash balance. He said that if an assistant manager is retained his duties should be to soli-cit new members and push collections of pledges. What is the matter with the Chamber's finances? Not

that it spends too much. The budget is a modest one, much smaller in proportion to the size of this city than was spent in the Idaho town from which this writer came to Salem less than a year ago. A breakdown shows that not enough is being spent on some vital projects, such as agriculture, tourist promotion and conventions, to name

only three.

Why isn't enough money coming in to finance an adequate program? Is it lack of members? No, the Chamber has a bigger membership than most such organization to local nopulation. tions, in proportion to local population,

The trouble is that the members do not pay enough. Of 834 members, 594 pay \$25 or less and only 20 pay more than \$100. This is an unusually large number for the low brackets and an unusually low one for the higher. The majority of Salem firms pay about half as much to the Chamber of Commerce as they would if they were located

in many another town.

It should be added that Salem business concerns are also supporting another agency, the Salem Industrial Dewhich does a job undertaken by the Chamber in most towns. Even so, the Chamber's support is inadequate. Salem's business community will suffer unless it is substantially increased, especially projects like the three we mentioned above, which will definitely bring additional dollars into local business

McCARTHY SOME PUMPKINS

The late Senator Harry Lane of Oregon, during his first visit to the capital made the comment that "a United States senator is some pumpkins in Washington," to express his surprise at the deference shown and the power accorded to the office. In comparison little attention is paid to a representative.

The effect of this power, in many instances develops a megolomania of grand illusions and exalted egotism-and sometimes a messianic complex. There have been many examples of this among our senators as well as other public officials, especially the "self-made man who worships his creator." The senate always has them. Their chief resource is a self righteous demagoguery. The late Huey Long, who aimed at the presidency on a plat-form of "every man a king," was the only one of many thus afflicted. They all have their fanatical followers,

Senator McCarthy of Wisconsin evidently imagines himself the biggest pumpkin in the senate, hence his campaign for the presidency on an anti-Red spy mania of largely unproven accusations known as "McCarthyism."

While disavowing any idea of challenging President Eisenhower's leadership he has issued a call for a nation-wide "write the president" campaign designed to reverse one phase of the administration's foreign policy. words, he invokes an unprecedented unofficial plebiscite against the president and congress for not antagonizing our friendly allies in the United Nations by cutting off foreign aid unless they cut off all trade with nations behind the iron and bamboo curtains.

Dulles stated the administration policy and Ike approved that "U.S. dollar aid to friendly nations does not give us the right to dictate their foreign trade policies," as follows: "McCarthy's appealthough most have agreed to ban strategic war exports.

And the president declared that "unity among free nations is our only hope for survival."

The asked for barrage of recall telgerams will have agreed to ban strategic war exports.

And the president declared that "unity among free nations is our only hope for survival."

Prediction, Dec. 28, 1932, read scratening their heads to find out exactly what the president meant by that.

Obviously, he wasn't referring to drought relief, because earlier in the press conference bulls. A public hearing might not have changed the results, give us the right to dictate their foreign trade policies,"

tions is our only hope for survival."

The asked for barrage of recall telgerams will have a boomerang effect on the blatant Wisconsinite, though spy scared fanatics will respond. It will probably prove that McCarthy has grown too big for his breeches and not as big a pumpkin in national and international affairs as he imagined. It will probably be his "come-uppance."

—G. P.

The asked for barrage of recall telgerams will have eventual target will be Secretary of State Dulles. It would have results that as costing about \$40,000,000. And he couldn't have been thinking of losses on the price-support program because that figure is pleasant "off-the-cuff" re-marks. They're particularly solutions as he imagined. It will probably be his "come-uppance."

The asked for barrage of recall telgerams will have eventual target will be Secretary of State Dulles. It would have results, but certainly it would have results that McCarthy has grown too big for his breeches and the factors involved—the staff have been trying to figure of losses on the price-support program because that figure is pleasant "off-the-cuff" re-marks. They're particularly solutions.

FALL GUY IN THE CAN STRIKE

When the principal tin can factories of the country were tied up this week by a strike we made a mental note that if it had to come there couldn't be a better time from

the standpoint of public inconvenience.

The 1953 crop must be nearly all packed by now. In any event the canneries would surely have their supply of cans on hand. A strike that might prove disastrous in summer or early fall could be left to the participants

to settle at their leisure at this time of the year.

But now it develops that there is a "fall guy" after all. The citrus growers of California, Texas and Florida' harvest their fruit during the winter and must have millions of cans for the portion of the crop that goes into cans. If the strike isn't settled pretty soon they face a major disaster.

In our closely integrated society you can't pinch a dog's tail in Chicago or Pittsburgh without hearing a lusty yelp from the far reaches of the country. We're all in the boat together, to ride, sink or swim.

DEMPSEY 'COMES CLEAN'

Jack Dempsey, quizzed by reporters regarding a report that he and a wealthy Florida widow are to wed, admits that they are "talking about it," but adds "we are not yet engaged."

Here is revealed one of the penalties of fame-or notoriety if you prefer to think of it that way. The ordinary Joe Doaks can do all the "negotiating" the object of his affections will permit without ever once being put on the spot by the press and forced to issue a statement,

Dempsey retired from professional boxing before most Words vs. Deeds of the present day boxers were born, but fame still pursues him and takes its tell in public curiosity even in

such extremely personal matters as pitching the woo.

Those who've never had celebrity status often long for it, we imagine, but we also suspect that many of those who've had it wished upon them long for the blessings of obscurity they once had.

We Must Plan

In a little more than two years — from April, 1950, to July 1, 1952, to be exact—the population of the western states increased by nearly sev-en per cent. Or roughly double the national average.

Now, for Washington state, a population of 3,020,000 is forecast for 1960—a scant 6 years away. This would be an increase of 641,037 beyond the 1950 count.

The old-fashioned inclination has been to think of such in-creases in terms of neighbors and customers, and that is cor-

ment.

new to laugh at.

because they've got less steam in their heads."

settle major labor disputes.

stop and share a belly laugh."

long as it is really funny, and

course.

to tip my mitt."

not cruel.

But we must also note that the labor force of the state will increase from 957,511 to 1,208,-000 in the present decade.

In other words, these new people must be considered not simply as customers and neighbors. For nearly every one of them—certainly every one of the socalled "labor force"—has himself something to sell to us, and moreover it will be something we must buy.

He must in short, sell his feesional comics to send health and the something will be something to sell to us, and moreover it will be something will be something to sell to us, and moreover it will be something will be something to sell to us, and moreover it will be something will be something will be sub-more to the phone and then put by his plate a printed card

Said G. J. Ticoulat in Scattle recently: "Today business and industry have two functions. The first is to manufacture and sell products. The second function, and equally important, is to purchase labor."

And who is Mr. Ticoulat? A during this time out, and may dreamer? A labor leader? No. be when they start arguing Mr. Ticoulat is a vice president again they'll make more sense by BEN MAXWELL Mr. Ticoulat is a vice president of Crown-Zellerbach Corpora-tion. And his conception of future population as labor to be hired, before they can be viewed as customers, is sound thinking shared by the best type of business leaders today.

This conception not only could have great effect on how this region meets its new pop-ulation problem in the next five to ten years—it very positively must have such effect on that situation.

This newspaper has been It is with heartfelt gratitude interest in coordinated region-that I write to congratulate al, state, county and municipal Washington—Secretary John different story, and farmers you on your fine editorial on fluoridation.
