## How they save money on cars

Sure, the prices of cars are up. But they'd probably be higher if it weren't for advertising. Both the dealer and the manufacturer use advertising as their low-cost way to get across news about their products. Selling more goods this way makes mass production possible which means lower production costs, lower selling costs, lower prices than would otherwise occur. Yes, advertising is a low-cost selling method that helps keep your living costs down.
