ell, county extension agent. Gross income for the year is estimated to be \$30,600,000.

The greatest cut of returns came in the horticultural field, according to County Extension Agent Ben A. Newell. Total farm sales were off nearly 134 million dollars from 1952—showing a \$9,126,000 total. Low yields and prices for onions accounted for much of the drop and an extremely light walnut and filbert crop were other contributing factors.

Returns from crops including grain, grass seeds, hay, mint, hops, etc., was of \$750,000. Low yields and prices of mint, reduced hop acreages, a poor winter wheat year and lower grass seed prices all joined in cutting the gross for crops to \$10,050,000.

In the field of livestock, dairy and poultry the cut back was not as pronounced s a y s Newell. Increased numbers of dairy cattle, good egg and pork prices helped to maintain this source of farm dollars.
