

Society Rejects Joliot-Curie

NEW YORK (AP) — A membership application for Nobel Prize-winning French chemist-physicist Mme. Irene Joliot-Curie has been rejected by the American Chemical Society on the belief she is Communist.

Mme. Joliot-Curie said in 1948 — when she came to America for a lecture tour and was detained briefly on Ellis Island — that she was sympathetic to Communism

"in many things" but was not a party member. Disclosure of her application came in correspondence published by the monthly Bulletin of the Atomic Scientist, out Monday. Mme. Joliot-Curie was ousted by the French government from its atomic energy commission in 1951. Her husband, Frederic Joliot-Curie had been removed as head of the body a year earlier because of Communist associations.

Butte Miners Stall Election

BUTTE, Mont. (AP) — Butte Miners' Union No. 1, stalled in its bid for a National Labor Relations Board election, moved Sunday for a District Court election to determine its bargaining agent.

The action was voted by an estimated 800 miners affiliated with the International Union of Mine, Mill & Smelter Workers (IUMMSW). They are warring with a group affiliated with the United Steel Workers of America (USWA) over what union shall represent them.

The steel workers' group blocked a proposed NLRB election through legal action. It insisted instead that a vote be held jointly by Butte miners and Anaconda smeltermen in a single bargaining unit.

An NLRB examiner said a hearing will be held here about March 1 on the dispute. Dist. Judge John B. McClernan warned, however, that should there be "failure, refusal or inability" on an election by March 1, the court would appoint an impartial labor relations board of its own. The CIO faction bolted the IUMMSW last December, charging its leadership was Communist dominated. Mine-Mill was ousted from the CIO in 1950 on a similar charge.
