Chicago Grain - CHICAGO (UP)—Most grains sold off after an early price bulge on the board of trade Wednesday but wheat ended higher on a last minute buying flurry. Soybeans and wheat attracted the most early buying. Wheat was bought on prospects of export business and reports of dust in the air in the Texas Panhandle. Later, the Weather Bureau noted recent moisture had improved prospects in parts of the great plains. Buying in soybeans again was based in part on the strength of soybean meal which scooted up to a new 1.84 high at \$83.00 to \$85.50 a ton. However, profit taking got the better of this market. Feed grains were reluctant to forge ahead on the early bulge and they retreated most readily when the market sold off. Wheat closed 1/4 higher, March 1.16 1/4, corn 1/2 higher, March 1.51, rye 1/2 to 1 cent lower, March 1.17 1/2, soybeans 1/4 lower to 1 1/2 higher, March 3.36 1/2, and lard 2 cents lower to 10 cents a hundred pounds higher, March 16.92.

Why gasoline is a real bargain today. LIVING COST up 53% since 1925. FOOD up 70% since 1925. CLOTHING up 65% since 1925. GASOLINE up only 20% (Excluding tax). 75 years of planning ahead to serve you better. STANDARD OIL COMPANY OF CALIFORNIA

Two facts lie behind the low price you pay for gasoline: oil companies work constantly through research to improve products and keep prices low, and they compete intensely for your patronage. That's why Standard opened the West's first petroleum research laboratory 32 years ago—and invests about \$6 million annually in research today.

One result you see here. Thanks to competition, gasoline prices (aside from taxes) have risen only 20% since 1925... less than half as much as practically anything else you buy. But there have been other benefits for you, too. Research, motivated by competition, has resulted in a steadily improving gasoline. Two gallons of modern gasoline do the work that required three in 1925, and this improvement has paved the way for lighter, more efficient car engines that give you more power, performance and economy. Competition and research have led to better gas station service, as well, and to the world-wide search that has discovered the largest known oil reserves in America's history. Last year alone, Standard Oil Company of California invested \$225 million in exploration, new oil wells, and improved facilities to keep pace with our competition. The net result to you is far better gasoline—at prices which make it one of the real bargains in your family budget today.
