Fleur Cowles Turned Down Envoy's Post

BERCHTESGADEN, Germany (AP)—Fleur Cowles said Wednesday President Eisenhower once offered her an ambassadorship but she turned it down.

"I am probably the only woman in history to turn down an ambassadorship," she said in an interview here.

Asked to which country, she declined to elaborate.

"I would feel imprisoned in an embassy as ambassador," she said, "and things I would like to do, such as talk and write, would not be possible."

She came to Bavaria to speak at the 18th conference of American Women's Activities in Europe on Use of Atoms for Peace.

She is now married to Tom Montague Meyer, a British lumber man. She was divorced from Gardner (Mike) Cowles, editor of Look, in May, 1955.

Gold Controls End Advocated By Trade Unit

YAKIMA (AP)—More than 230 delegates ended the 1956 meeting of the Pacific Northwest Trade Assn. Tuesday night by calling for an end to government controls over gold.

The association, in a resolution passed unanimously, endorsed a bill authored by Sen. Case (R-SD) which would abolish a statutory requirement that all freshly-mined gold be sold to the government for \$35 an ounce.

The chairman of the Resolutions Committee, Nat Brown of Yakima, told the delegates the world market for gold would reopen if Case's bill were passed.

"This, he said, would mean an increase of price for the metal to a point where it would be profitable to reopen closed gold mines.

In the conference's concluding speech, Sen. Jackson (D-Wash) told of his recent trip through Russia and the Middle East. He said Russia is using its industrial strength as a weapon in world foreign policy.

Erosion Halt Program Set

BOISE, Idaho (AP)—A program to prevent erosion on the banks of reservoirs and rivers throughout the Columbia River system is being undertaken by the Reclamation Bureau, a spokesman for the government agency said Tuesday.

Keith Anderson of the bureau's Boise office told the Columbia Basin Interagency Committee's subcommittee on water pollution control that willow trees have been found "quite promising" as a means of arresting erosion.

The Reclamation Bureau, Anderson told the subcommittee, is planning an extensive willow planting program in the Columbia Basin during the next few years.

Anderson also said the bureau is starting a joint survey with the University of Idaho on maximum utilization of irrigation and underground water supplies.

The bureau itself, Anderson said, has started a study of the chemical qualities of rivers and underground waters in the basin, where the bureau's investment in dams, reservoirs and irrigation projects amounts to 800 million dollars.
