## Some Stocks Hit New Highs As Index Heads for Cellar

By SAM DAWSON NEW YORK (M—One of the fas-cinating things about the stock market is that even on days when the price index is heading for the cellar there always are some stocks making new highs.

And in years like 1856 when

stocks making new highs.

And in years like 1956 when the averages end up pretty much where they started there will be stocks making as much as 300 per cent gains in price and others slipping by as much as 35 per cent.

The trick is to be able to guess ahead of time which stock is going to do which. Few mewspapermen we know have that knack, But hindsight can be interesting and perhaps helpful.

New York Stock Exchange, names today 20 stocks that rose the most Tennate price and the 20 that dropped the most. Then it plays the old game of seeing how an investor would have fared if his foresight were as good as his hindsight. If at the end of 1955 he had bought 10 shares of each of the 20 stocks that rose the most today 20 stocks that rose the most tropped the most. Then it plays the old game of seeing how an investor would have fared if his foresight were as good as his hindsight.

If at the end of 1955 he had bought 10 shares of each of the 20 stocks that score the most. Then it plays the old game of seeing how an investor would have fared if his foresight were as good as his hindsight.
