Extravagant Praise Heard For New Facial Cosmetic

Rather asionishing results in contour correction and improved skin appearance have been reported with a treatment which has been used locally the post few years. Just as important as the product used which is a blend of are oils and astringents, is the manner in which it must be applied, which above sketches indicate. Requires ten minutes daily.

What apparently looks like a small atom bomb to the field of facial treatment is on sale locally.

For among the long list of rot among the long list of rather astonishing claims made for the treatment are statements that it will help flatten intie puffs that form on jaw-lines, help smooth out lines from mouth-to-now, and nelp improve sagging muscles.

And although is sounds almost as though it should fall in the "Too-good-to-be-true" classification, it is being soid by a which is hown coametic house which is noted for understatement in claims for its products.

Special Method Developed

The treatment has undergone rigid tests on skins which had chronic under skin eruntions, on complexions which looked stag-gish and thick, and on those who had distinct contour faults.

had distinct contour faults.

And it has been reported that under-skin eruptions cleared in a short time; that singuish skins had an weakened quality; that corrections such as smeethout of mouth-to-pose lines, flattening of little push that form on law lines, reduction of double chins, and a more perfect general alignment of facial contours resulted; and that "My skin has never seried clearer or finer" was an expression most often used by those undergoing frestment. sion most often used by undergoing treatment.

Fresher Skin Claimed

er, cleaner and clearer looking skins, resulting in skine with a young, translucent quality are further claims which have all chemists with the unique astringent and oil blend, which contains no hormones. The blend must be used accord-

ing to very specific instructions some idea of which may be gained from the accompanying a ketches A little pamphlet audining the method in detail is enclosed with each bottle.

They have found that results begin in show up inside one week, when the treatment is followed to the letter and faithfully, and that "the effect within three weeks is usually starting." And that "continues to maintain and improve automarance."

Two types of the blend appear, one for dry and normal skins, one for dry skins.

Years Declared Pared

Comment of a successful Broadway actress, who tested the treatment for the house, was that "I really look ten years younger, and in such a short time, too."

An amusing story is of one New York tester, who had occa-sion to go south quite frequently,

eduction of double chins, and a more perfect general alignment of facial contours resulted, and hat "My skin has never seemed carer or finer" was an expression most often used by those indergoing treatment, teaher Skin Cloimed
