New Planes Put Air

whole can step into the ranks of recognized American industrial money makers.

The new planes mean lower costs per to nmile as well as greater capacity. Officials think the great potential now lies in air freight's ability to aid manufacturers cut distribution costs.

This month Flying Tiger began transcontinental operation with its new fleet of 12 Super H Constellations. It says its scheduled air cargo service now can be carried in the first quarter of 1956.

In the profitable South American field, Panagra reports its air cargo volume rose 51 per cent during 1956 and is still gaining. It now carries, on average, four lons of cargo a day on its routes in seven Latin American countries, It has added two special 42 argo planes to expand service.

Haulers in Profits

By SAM DAWSON

NEW YORK M-New planes to-day are lifting the profits tonnage for the fleedgling air freight increased cargo to mileage this year over last, Most expect additional speedier and bigger craft to carry their sales volume to new heights this year and next.

For some the new equipment is particularly handy. The end of the profitable air lift to Korea hurt some of the all-cargo carriers agone of the agone of the advertisers and must therefore the new planes were delivered.
