

## Look to the limbs for Autumn fun

Trees are especially inviting in the fall with their colorful leaves shimmering in the sunlight. Piles of leaves provide an impromptu play area for kids, and the more visible branches beckon the agile for that last climb before spring.

Ripe fruit dangled from a campus apple tree (top left), while Dolan Waheneka, Jr. went leaf-gathering with his Headstart class (top right).

Julia and Nancy Johnson frolicked among the leaves in an after school free-for-all (center left), and Michelle Wells monkeyed around in the tree next to the old administration building (bottom right).
