

Ash, rain didn't stop Delta Park Powwow

Who is that masked man, anyway?

Rain gear-powwow style

With Teepees looking dingy due to ashfall from erupting Mount St. Helens, the 1980 Delta Park Powwow began its activities as scheduled. Rainfall also contributed to dismal conditions at the powwow site, but spirits remained sunny through it all.

Saturday was the first day dancers could perform without ruining feathers or buckskin. Some dancers decided tennis shoes would be more appropriate for the conditions. Those who wore their traditional footgear found their moccasins soaking wet and even slightly cut up by the sharp-sided volcanic ash.
