Teenage rebellion—A struggle for independence

Healthy teenagers rebel against parents.

Arguments and quarrels with adolescents are not symptoms of an unhappy home or an indication that something went wrong with earlier discipline.

What appears to be rebellion in teenage children is a healthy struggle for independence. Parents expect their children to develop critical judgement, form opinions, and change things but, oh, the parental discomfort when teens start to take new ideas seriously.

Worried parents, who thought everything was going well, now face griping, arguing, defiance, complaining, alternating high and low moods, and negative reactions to family plans.

Going through this stage is necessary if the adolescent is to

Keeping plants healthy

Houseplants make excellent holiday gifts, especially if both the giver and receiver take steps to ensure that the houseplant stays healthy.

Plants differ in their needs for light, water and fertilizer. Too much water will kill a jade plant, while a fern needs frequent watering. Chinese evergreen will grow in poorly lit areas, but an African violet needs to be placed in bright light.

When giving a houseplant as a Christmas gift, make sure that the plant is in a pot that can drain away excess water. Also, the plant should be in a soil mixture that supplies adequate air and water to plant roots, and that anchors the plant family.

You may need to do some repotting to make sure the soil

mixture is correct. Water a houseplant only when the surface of the potting soil feels dry. When watering, apply enough that some runs out the bottom of the pot, which you can then discard. Irrigating from the bottom is effective, but every third watering should be from the top to flush excess fertilizer salts out of the soil.

Place the plant in direct or indirect lighting according to its individual growing requirements. If these are unknown, plant shops and bookstores have excellent houseplants books that can

Fertilizer is necessary only when the plant is actively growing. Many indoor plants will grow vigorously for awhile, then go into a resting period when the fertilizer requirements are

Houseplants seldom die of starvation. More plants are killed by to much fertilizer rather than too little.

Houseplants generally prefer a higher humidity than most homes supply. Help your plant adjust to the conditions in your home by misting the foliage periodically, or by setting the pot on a tray of pebbles and water. But be careful not to let the bottom of the pot touch the

Also, keep the leaves clean by bathing or spraying them with lukewarm water. If the plant is too large to move, wipe each leaf clean with a soft, damp

Using a laundromat to clean your clothes? If so, there are several things you can do to make the job easier.

The first is how you load the machines, says Mollie Driscoll, Warm Springs/ Jefferson County Extension agent. You may be tempted to overload them to

save on both time and money. But your clothes will suffer in the long run. They won't get as clean-can easily get dingyand also may get so wrinkled that they will need ironing.

Next, consider what laundry products you use, Mollie suggests. It may be a good idea to add bleach. This will kill bacteria that can survive in public laundry machines and that detergent alone can't remove.

Spend a few extra quarters on laundry day so you won't have to spend extra dollars later to replace clothes or pay medi-

Menus offer tasty "Diet Plates"

Going out to eat no longer means you have to take a break from good nutrition.

More and more restaurants are offering lighter, low-calorie dishes. Going by such names as "spa cuisine" or "lean and light," this healthier fare can be found in places ranging from dining halls to family eateries to the fancier upscale restaurants and hotels.

The current trend focuses on food quality. Fresh ingredients as well as interesting and unusual flavor combinations are fea-

Satisfaction is derived not only from the way the food looks and tastes but also from its healthfulness.

The classic "diet plate"-hamburger patty, cottage cheese, and canned peach-has never been that exciting to most people, the specialist observes. Actually, many of the traditional diet plates overemphasizes protein and are not necessarily that low in calories.

Now, through a greater emphasis on fresh fruits and vegetables, salads, whole-grain products, and fish and chicken entrees, diners are discovering that eating "light" can still mean eating delicious and satisfying meals, says Raab.

Consumer demand for health-

increased awareness about the link between good nutrition and tion information on request. good health. Many are cutting down on their intake of fat, sugar and salt, and want their meals away from home to suit their everyday eating habits.

Men as well as women are feeling more comfortable about ordering broiled fish, salad, and vegetables at a business lunch in place of the traditional steak.

In addition to new choices, a customer also may find nutrition information printed on the menu. This may be simply the

Keeping whites white

Removal of blood stains and mud smudges from white clothing requires a cold water rinse with some agitation or rubbing before detergent washing. Presoak products containing emzymes effective in removing protein and starch stains. Wash

Keeping whites white isn't as and don't overload the washing machines.

For washing whites, use hot-or at least warm-water. Also, a water softener will let a heavy-duty, low-suds detergent work more effectively.

Be sure the clothing is thoroughly rinsed. If you need static control for nylons and polyesters, use a fabric softener in the
