

Bureau employees receive awards for service

William Apgar—Special achievement award

Aldene Pevo—20-year service

Ronald Recker—Special achievement

Daniel O'Brien—Special achievement

Forestry personnel have been able to continue to get around quite well in the field due to the mild winter. They have been working, cruising, and performing layout work on 1987-89 logging units and timber sales.

Besides working in the field we have been preparing forest officers and other reports, performing studies such as Watershed to answer Tribal Council concerns on future direction for Warm Springs Forest Products Industries, attending training and workshops and of course, moving out of our offices into temporary trailers adjacent to Shitike Creek. The main Forest Office, where permits are issued, and Bob Harned, Forest Manager, are located, is the trailer closest to the road (#1).

Our new permanent federal employees, are David Harding, James

Coburn, Catherine Vigil, Andy James and Brock Long, all forestry technicians and Tom Branson, forester, are being utilized and trained within their assigned units and are proving to be good additions to our staff. Also, Roberta Steele joined clerical staff on February 2, 1987.

We are sorry to see Ralph Goode, Darryl Krusen and Jim Campbell leaving. Ralph is taking the fire management officer position at Flathead, Darryl is taking a forester position at Umatilla and Jim is transferring to Olympic Peninsula. Both Ralph and Jim are going "home." These transfers are all laterals and do not involve promotions.

Dennis Martinez has moved to Sale Administration after working ten years in the pre-commercial thinning program in the development section.
