

## Family Abuse Prevention resolution passed

In August, 1989 the Tribal Council passed Resolution 7868 which allows for abuse victims within a family household to "Petition for a restraining order to prevent abuse", without having to file criminal complaints or file for a divorce petition. Prior to this law the only way to obtain a restraining order was to file criminal complaints or file for a divorce petition.

Now a restraining order is obtained by filing a "petition for restraining order to prevent abuse".

as per WSTC 331.805 (2), family or household members means spouses, former spouses, extended family members, persons residing in the same household or persons who resided in the same household within one year immediately preceding the filing by one of them of a petition under WSTC 331.810.

**WSTC 331.810, Petition to Tribal Court for Relief**

1) Any person may seek relief under WSTC 331.800 and 311.820 and 202.120 by filing a petition

with the Tribal Court alleging that he or she has been the victim of abuse committed by the respondent. The tribal court shall have jurisdiction over all proceedings under WSTC 331.800 to 331.820, and 202.120.

2.) A persons right to petition for relief under WSTC 331.800 and 311.820 and 202.120 shall not be affected by his or her leaving the residence or household to avoid abuse.

3.) WSTC 331.805, abuse means, (a) attempting to cause or intentionally, knowingly, or recklessly causing bodily injury, or, (b) intentionally, knowingly, or recklessly placing another in fear of imminent serious bodily injury.

When the petition is filed in the court with specific facts of what has happened, it is presented to one of the judges to review and upon the facts presented, the judge will approve or deny the request/

petition.

When a petition is granted, an order of restraint will be issued immediately pending a 10 day hearing at which time both parties will be present to state whether the restraining order should or should not be continued.

The Legal Aide department of the court will be able to assist in filing petitions.

### Title V to meet

The next meeting of Title V, Part A, Parent Advisory Committee will be held in the Library at The Warm Springs Elementary School, Tuesday, February 13, at 7:00 p.m.

Dr. Steve Nelson of the Northwest Regional Educational Laboratory will be giving the mid-year progress report.

All interested persons are urged to attend.

## Financial Aid forms due

The Warm Springs Education Department encourages those interested in vocational education or higher education to fill out a Financial Aid form as soon as possible. High school seniors may also want to pick up an application for

Minority Achievement scholarships.

Applications are available in the Education Office in the Old Boy's Dorm. Deadline for all applications is March 1, 1990.

## Learn about the fundamentals of investing

These days, investing your money is a lot more complicated. New investment products are developed, old ones change. Opportunities come and go. Becoming a better investor means becoming better educated. And in today's rapidly changing market that means taking a fresh look at investment basics.

That's why we at Merrill Lynch, are offering an investment seminar on the fundamentals of investing.

In it the Merrill Lynch financial consultants will discuss investment objectives, tax savings, how to assess your own financial situation and determine your goals accordingly. And a lot more.

DATE: February 1, 1990 TIME: 7:00 p.m.

## Requests submitted for land use permits

Five requests for land use have been submitted to environmental coordinator Gerald Henrikson by Warm Springs tribal members.

Lee Johnson requests a homesite lease on tribal land in the Metolius Bench area. The tract is presently rangeland used for grazing purposes with adjacent lands. The lease terms call use for a period of 25 years, automatically renewable for an additional 25 years.

The land lies westerly of the M-100 Road in the Metolius Bench area. No live streams are located nearby and domestic water will be accomplished by drilling a well.

Principle living components are cattle, horses and wildlife. The site is located within walking distance of three homes but is away from all major traveled roads.

Adverse impacts include construction of the home and road but the proposed action is not expected to harm the environment and does not appear to meet criteria requiring preparation of an Environmental Impact Statement according to the Warm Springs Realty Office.

Leontyne T. Davis requests a homesite on allotted land located in the Wolfe Point area. The tract is presently being used as open range land along with adjoining lands in the area.

Topography has a moderate incline. Water will be supplied by the Deschutes Domestic Waterline.

Living components in the area include native grasses, weeds, sagebrush and roots. Principle animals are cattle, horses and wild animals. The site is within walking

distance of an established subdivision but well away from the Kah-Nee-Ta highway.

Adverse impacts, construction of home and road, would create initial topsoil disturbance and long-term intensive use on the driveway. The action does not meet the criteria for an Environmental Impact Statement.

Jerry Wewa requests a homesite lease on tribal land in the Metolius Bench area. The tract is presently used for grazing purposes with adjacent lands. The lease term requested is 25 years, automatically renewable for an additional 25 years.

Living components include junipers, native grasses, weeds and sagebrush. Animals in the area are cattle, horses and wild animals. The site is sparsely populated with several homesites in the Indian Park turn-off area.

An access road will be built to the site from M-100 Road.

Adverse impacts include construction of their homesite and access road could be constructed so few junipers will be affected and will screen the site. Once established, the homesite could be kept and maintained in a clean state.

The preferred alternative as suggested in the assessment presented by Warm Springs Realty would be to have the applicant locate in another rural area of the reservation.

No Environmental Impact Statement is recommended.

Jerry Wewa also requests a graz-

ing lease on tribal land adjoining his homesite request area in the Metolius Bench area.

The tract is presently being used as open range land along with adjacent lands. The lease term is for five years.

No live streams are located in the area and water would be provided by drilling a well or running a waterline to Pipp Springs.

Adverse impacts include construction of a fence cutting off open range for a small amount of land normally used for grazing. Topsoil would be disturbed and impacted.

Priscilla S. Yazzie requests a grazing lease on tribal land in the Miller Flat area. The tract is presently being used as open range land along with adjoining lands. The lease calls for a term of five years.

The land lies north of the County

Line Road (P-600) and takes in a small growth of pine trees and a drainage ditch. Topography is fairly flat. No live streams are located in the requested area. Domestic water will have to be provided by drilling a well.

Living components include junipers, pine and native grasses, sagebrush and roots. Principle animals are cattle, horses, deer and other wild animals. The site is in an area that has several established homesites within walking distance.

Adverse impacts include fencing to cut off 76 acres of open range land. Initial topsoil disturbance will occur with long-term intensive use by livestock within the fenced area.

The proposed action does not appear to meet the criteria or action requiring preparation of an Environmental Impact Statement.

## Realty asks for "go ahead"

The Warm Springs Realty Office has requested the issuance of a No Significant Impact and Notice of Availability for development of the Sunnyside Subdivision, Section 1 and 12, Township 9 South, Range 12 East, Willamette Meridian, Jefferson County, Oregon. The tract is already subdivided, but an environmental analysis is necessary.

The site of the Sunnyside Subdivision is west of Kah-Nee-Ta Road, North of Warm Springs, Oregon. The water supply will be served by the Deschutes Domestic Water System and air quality is generally good.

Living components of the area

include native grasses, sagebrush and juniper. No principle animal species is located in this area and only one homesite is located within a mile of the subdivision.

Roads and necessary utilities are already placed.

Analysis of the environmental impacts of the proposed action indicates that adverse impacts include disturbance of topsoil and compaction during construction. Preparation on an Environmental Impact Statement is not recommended as the proposed action does not meet the criteria requiring such preparation according to the Realty Office.
