Snack time

Snacking on berries at Sherar's Falls occupies young boy while his family fishes.

Hope seen for fish runs

A unique experiment that could help rebuild salmon and steelhead runs throughout the Northwest is beginning in Central Washington's Yakima Valley. The experiment involves using a new hatchery complex, called the Yakima Production Project, to replenish the fish runs that spawn in the natural environment. In the past, hatcheries have been used principally to augment harvest, not rebuild native runs on a sustained basis.

At a meeting this week (August 8) in Portland, Oregon, the Northwest Power Planning Council gave the Bonneville Power Administration, the Yakima Indian Nation and the Washington departments of fisheries and wildlife permission to proceed to the final design phase

of the Yakima Production Project and to continue with prefacility studies. A final decision on construction would be made in about two years.

The project will be a laboratory for testing a technique, called "supplementation," to rebuild runs in the Yakima Valley. With supplementation, hatchery-produced fish are released into streams with naturally-produced fish. If successful, this technique may be the Northwest's best hope for rebuilding its salmon and steelhead runs. Supplementation has been used to re-establish Atlantic salmon on the East Coast, and sockeye salmon in Alaskan lakes, but has not been

Ancient dugout canoe discovered

A Seattle man who took home a dugout canoe he reeled in while fishing says he didn't know it was a centuries-old artifact.

Gene Fairbanks says he'll gladly give the canoe to an archeologist who plans to preserve it for the Muckleshoot Tribe.

Fairbanks was fishing in Angle Lake in the city of Sea-Tac when he snagged the canoe. He thought, at first, it was a log.

He took the 14-foot canoe home and had it in his back yard when he saw a television report about fears

that the canoe had been stolen from the bottom of the lake.

Amateur archeologist William Walker had discovered the canoe under 16-feet of water last summer while diving. He planned to remove the canoe later this week using a six-person dive team.

The canoe is believed to have been submerged for 100 to 500 years.

Walker discovered the canoe was gone while he was diving Saturday.

Zone 6 fishing season set

The Columbia River Compact (the states of Oregon and Washington) held a public hearing to adopt commercial fishing dates for August. For the Zone 6 fishery, the adopted season is: 6 a.m. August 27 to 6 p.m. August 31.

An eight inch minimum mesh restriction (eight inch mesh or greater) will be in effect for the fishing period.

No driftnet fishing is authorized.

Allowable sales: The sale of scaffold or gillnet caught fish is permitted during open commercial fishing seasons. Salmon, including steelhead, walleye and shad may be sold during the above season. Incidentally caught sturgeon may also be sold.

Sanctuaries: All river mouth and dam sanctuaries remain in effect. The smaller Springs Creek Hatchery sanctuary of 150 feet around the ladder will be in effect for the first three fishing periods. The full Spring Creek Hatchery sanctuary (approximately 1 1/2 miles downstream of the hatchery and upstream to the White Salmon River sanctuary) will be in effect beginning August 27.

September fishing dates: September fishing dates for Zone 6 will be set at a Compact hearing scheduled for August 30.

Please contact your tribal Fish and Wildlife committee office for additional information on your tribe's fishing regulations.

If you have any fishing enforce-

Museum notes funding; additional monies needed

Less than two years ago, the concept of a tribal museum at Warm Springs was a long way from reality. No funds had been committed and many people questioned whether sufficient financial support could be found to build the facility. In October, 1988, the tribal membership voted in a referendum to allocate \$2.5 million to support the project. Since that time, a number of private, federal and state agencies have contributed the total amount very close to the campaign goal of \$4.5 million.

In spite of the good news that the Middle Oregon Indian Historical Society has raised nearly \$4.5 million dollars, it is still not enough. The pledge of \$300,000 from the M.J. Murdock Charitable Trust requires that a total of \$4.5 million be raised from all sources by December 31, 1990 before their grant becomes official. The effort

is still forty-seven thousand dollars short of that mark. The \$500,000 grant from the National Endowment for the Humanities is also a challenge grant requiring a three-to-one match of funds.

In addition, the state lottery regional strategy funds may be reduced by 30 percent. Cuts must be made in the states appropriation due to budget shortfalls caused by dwindling lottery ticket sales. The tribal museum is one of five projects to receive regional strategy monies.

On Monday, August 13, 1990, the MOIHS Board presented the tribal council with a status report. The council recommended that the board seek construction bids for the project to determine the exact amount needed to complete the building as planned. Preliminary cost estimates suggest that more money may be needed.

DATE:	SOURCE:	AMOUNT:
October 27, 1988	Confederated Tribes of Warm Springs (R-7689)	\$2,500,000
December 3, 1988	National Endowments for the Humanities	\$500,000
March 6, 1989	Meyer Charitable Trust	\$300,000
April 1, 1989	Housing and Urban Development	\$200,000
December 27, 1989	Pacificorp Charitable Trust	\$75,000
November 2, 1989	M.J. Murdock Charitable Trust	\$300,000
February 19, 1990	Sam S. Johnson Foundation	\$25,000
May 31, 1990	Occidental Petroleum Corporation	\$25,000
July 11, 1990	Central Oregon Regional Strategy	\$465,000
July 20, 1990	COCC	\$10,000
1987 thru 1990	Private & Individual	\$2,188
1988 thru 1990	Interest on Grants	\$50,849
TOTAL OF ALL FUNDS		\$4,453,037

Exhibit includes Warm Springs

If you're planning to attend the Oregon State Fair be sure to take in the Indian culture and heritage exhibits at the Jackman-Long building. Oregon is celebrating its 125th birthday this year, and in honor of this, three Oregon tribes have been invited to present craft displays, regalia and dancing demonstrations August 25.

Representatives from the Grand Ronde, Siletz and Warm Springs tribes will share information with the public during the demonstrations. The Warm Springs presentation will begin at approximately 7 p.m. Warm Springs 4-H students will be involved in a fashion show and dancing demonstrations.

"One of the main goals of the pageant is to show the people of the Northwest how different the various Indian tribes are," says Anna Clements.

School to get modular unit

Even though the 509-J School District levy failed August 14, Warm Springs Elementary will still have two new teachers and two classrooms in the new modular unit, due sometime in October. The unit will be located on the lawn near the gym in front of the school.

Each classroom will accommodate 30 students. Special classroom arrangements will be made until the new modular unit arrives.
