

# Community plan to accommodate future

There comes a time in every community to develop controls over how it develops and how people use or occupy spaces.

The community of Warm Springs has reached that point. The population within the community has increased to over 2200 and continues to grow.

Within the next 10 years it will increase to approxi-

mately 3000 and over the next 20 years could double in size. This would be the size of the present city of Redmond.

To prepare for this growth and development the Planning Department and Land Use Committee have prepared a proposed community plan for your review. Written or oral recommendations will be accepted

from the public through the next two weeks before they adopt a final community zoning map and zoning ordinance.

Both the map and ordinance may be reviewed at Tribal Planning or BIA Realty in the Tribal Administration Building through January.
