Smoke detectors provide warning, save lives

A working smoke detector cuts the risk of dying in a home fire by nearly half by providing an early warning and critical extra seconds to escape. The problem is that, although 82 percent of American homes have smoke detectors, nearly one-third don't work because of worn or missing batteries.

To reduce and prevent home fire tragedies in our community, Warm Springs Fire and Safety has joined forces with the International Association of Fire Chiefs and Energizer batteries for a compelling and effective national home fire safety campaign called "Change Your Clock, Change Your Battery." Our message is simple and potentially lifesaving: change the batteries in your smoke detector when you change your clock

back from daylight-saving time.

To help you remember, at 6 p.m. on Saturday, October 24, we will activate emergency sirens of all kinds throughout our community. As we sound the alarm on smoke detector neglect, we will be among thousands of other fire departments nationwide participating in the country's first national fire safety drill, "Operation Check and Change".

When you hear the sirens, check and change the batteries in your smoke detectors and take a few other fire safety prevention measures, such as checking your smoke detector itself by pushing the test button, planning "two ways out" and practicing these escape routes with your family. Remember, "Change Your Clock, Change Your Battery". It could save your life.

Each year, thousands of people needlessly die or are injured in home fires. Tragically, many of them would be alive or unharmed today had their home been equipped with a working smoke detector.

**It's time to fall back—

Hamburgers and hot dogs available

Proceeds for 1993 Drug- and Alcohol-Free Graduation Party

Halloween safety tips offered

Costumes, candy, ghosts and goblins...Halloween is almost here! Ensure your children have a safe and happy Halloween by using the following tips:

- Kids should always be accompanied by an adult.
- Carry a flashlight.
- Only go to homes that are well lit.

• Never go into houses where you do not know the occupants.

• Props, (i.e. guns, swords, knives) should be made out of styrofoam or cardboard.

• Jack-o-Lanterns with candles should be placed away from any flammable.

Costumes:

• Keep costumes simple. Long and fancy ones may cause you to trip.

• Buy flame resistant costumes or make them from flame resistant material.

• Buy or make costumes of white or light colored material, to be easily seen at night.

• Reflectorized patches or strips should be added to costumes or treat bags.

• Use non-allergic face paint in-

stead of masks, which can block vision.

• Wigs and hats should be worn well off the face and be securely fastened so they will not slip over your face.

• Wear regular street shoes.

Those homes who are receiving trick-or-treaters should remove anything that could cause children to trip and fall.

Steps you take for a safe Halloween will be appreciated by all. If you have any questions, please call Fire and Safety at 553-1634.

Free home inspections offered

Warm Springs Fire and Safety offers free home safety inspections to all community members. This includes the rural areas of Warm Springs as well. What does a home inspection consist of?

When an inspection is requested, Fire and Safety employees will meet you at your residence to conduct the inspection. The inspection will involve the identification and presence of any fire and life safety hazards, and also recommendations on correcting them. If you need assistance in planning your emergency escape plans, we can help you there too.

To schedule an appointment, call Fire and Safety at 553-1634.

Get into the Halloween Spirit!

Pumpkin Party October 21 at 7 p.m.

Halloween Carnival at 6:30 p.m. and

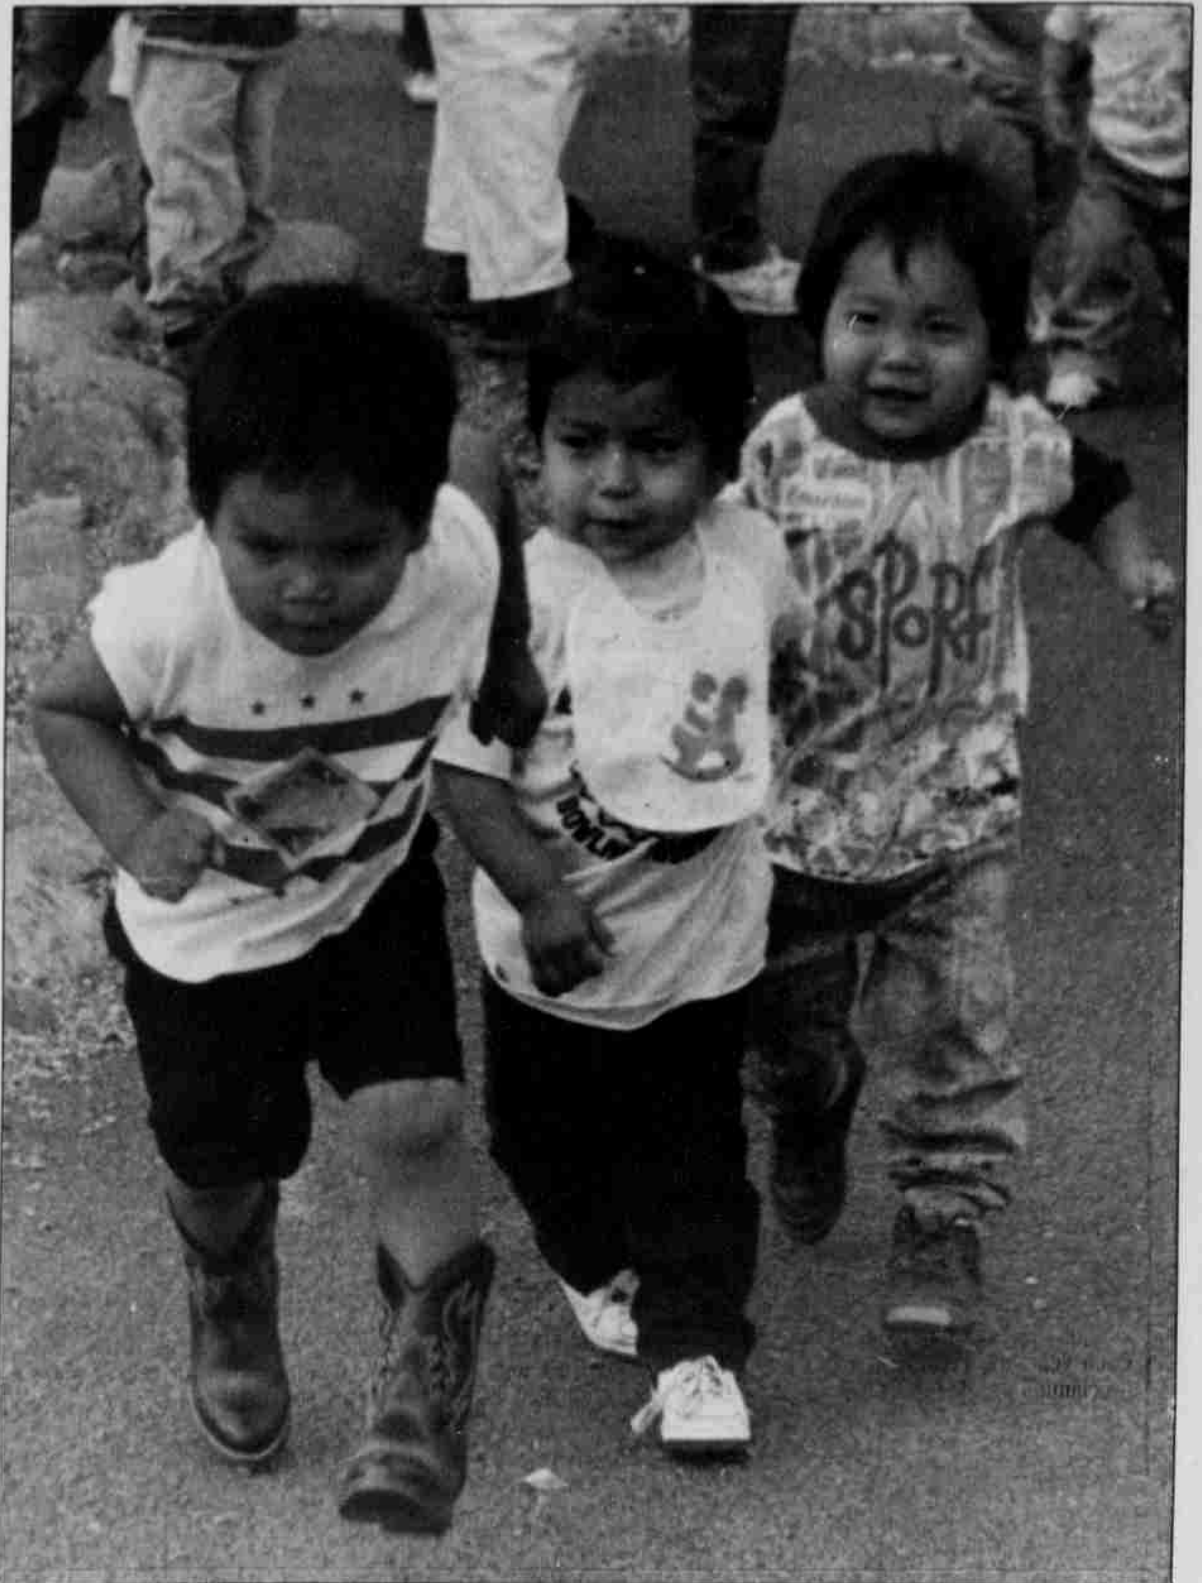

Halloween Movie at 8 p.m. October 28
