Positive Indian Parenting classes held each month

The Early Childhood Education Center is the setting for Positive Indian Parenting classes that began in October. The Positive Indian Parenting curriculum is designed to provide a brief, practical culturally specific training program for Indian parents. Developed by the Northwest Indian Child Welfare Institute, the goals of PIP are: to help Indian

parents explore the values and attitudes expressed in traditional Indian child-rearing practices and then to apply those values to modern skills in parenting; and to help parents develop positive and satisfying attitudes, values, and skills that have their roots in our cultural heritage.

Several community members attended trainer's training for PIP last

spring. These volunteers along with other community members, resources and elders will work together to present 8 Positive Indian Parenting classes for our community.

There are six classes remaining and anyone interested in attending, is welcome. The remaining dates and topics for the classes are:

December 15 — Lessons of the

Parent involvement encouraged by ECE staff

A major component of all Head Start programs, is parent involvement. It is recognized that parents/guardians are the first and best teachers for their children. Children benefit greatly when parents/guardians take an active role in their education. Children will usually: enjoy learning and school life more; improve their skills and attitudes — and do better in school; develop confidence in themselves and be better prepared for the future.

The Warm Springs Head Start program encourages parents/guardians to be involved with their children in many ways. Parents/Guardians are expected to spend time in the

classroom at least once a month. Having "extra helpers" in the classroom is something the children love and look forward to. Classroom volunteering gives parents a chance to see their children interact with their peers. It is also an opportunity for parents to learn new ways of speaking with children and learning activities as role modeled by the teachers.

Another way to become involved is by joining Parent Policy Council. The Parent Policy Council is made up of Head Start parents/guardians. They are involved in monthly meetings to help make Head Start program decisions. PPC reviews policies and procedures and is involved

in planning for the program. The next PPC meeting will be Wednesday, December 1, at noon. The ECE Parent Club is made up of all parents/guardians of all ECE program children. Officers are elected at a general meeting each year. Parent Club meetings are held monthly and usually include planning for upcoming events, craft workshops and parent trainings. Parent Club raises funds that go back to the children in the form of Christmas Stocking Stuffers, Easter Egg Hunt prizes, supplies for Parent Club workshops, items for parent training's, etc. The next Parent Club meeting is Thursday, December 2, at 5:30 p.m.

ECE health news: what to do about vomiting children

Gastrointestinal (GI) upset usually presents as vomiting and/or diarrhea. The most common causes of GI upset are viral infection, ingesting too much of a given food item, or ingesting something that "poisons" the stomach. The body's response to these "irritants" is to try and expel them and so vomiting occurs.

Fortunately, most cases of vomiting are not caused by the ingestion of "poisonous" substances, and so, steps to prevent dehydration are all that is usually needed. This is accomplished by changing the diet to eliminate milk products, solid foods, or sugarless gum and other products with artificial sweetener such as sorbitol

for 24 hours. Implement small, frequent feedings of clear liquids (liquids you can see through) such as chicken broth or bouillon. After 24 hours, if the vomiting has subsided, increase the diet to include soups, or the BRAT foods (bananas, rice, applesauce and teas) for the next 24 hours. By this time (48 hours) most

cases of vomiting will have resolved. If not continue this modified diet for an additional 24 hours, and call your doctor.

If your child exhibits any of the following, you should call your doctor:

- 1) Infants: keep in touch with your doctor every day 24 to 48 hours until symptoms clear, or until you are instructed differently by your doctor.
- 2) Signs of dehydration: no tears on crying; dry mouth; dark urine in small amounts, or no urine output in an 8 hour period of time prolonged sleepiness.
- 3) Fever greater than 10.5 degrees.
- 4) Blood in vomit or diarrhea.
- 5) Persistent symptoms for longer than 48 hours.
- 6) Lethargy.

Fluids of value in vomiting and diarrhea:

- 1) Infants: pediatric electrolyte replacement, gelatin water and lollipop.
- 2) Children and adults: weak teas, electrolyte replacements (sports drinks), gelatin water, lollipop and flat soda (cola, ginger ale, root beer, other soft drinks).

Warm Springs ECE encourages you to:
HELP CHILDREN DEVELOP HEALTHY HABITS

Here are some ideas for helping young children get into good health habits.

- Help them to wash their hands after using the bathroom and before eating.
- Remind them to cover their nose and mouth when they sneeze.
- Help them brush their teeth after eating and before bedtime.
- Buckle them up every time they go somewhere in a car.
- Practice what you preach. Remember children learn best from watching you.

If children learn and practice good health and safety habits at a young age, they will stay with them for life.
