Application for NSF Graduate Research Fellowship Program now available

Applications for the 2001-2002, competition for the National Science Foundation (NSF) Graduate Research Fellowship Program are now available. Information on the current guidelines and submissions of applications is enclosed.

The NSF will award approximately 900 new Graduate Research Fellowships to support graduate study in science, mathematics, and engineering. The NSF contracts with Oak Ridge Associated Universities (ORAU) to provide the support services for this prestigious fellowship program.

Enclosed program materials include: Guidelines for submission of Applications; Institutional Request for Application Materials form; instructions for FastLane; and the publicity poster. For additional information, contact: NSF Graduate Research Fellowship Program ORAU, P.O. Box 3010, Oak Ridge, TN 37831-3010, Telephone: (865) 241-4300, electronic mail: nsfgrfp@orau.gov, fax: (865) 241-4513.

The deadline for applying in the 2001 competition is November 7, 2000. Awards will be announced in

March 2001. Each three-year fellowship provides a stipend of \$16,800 for 12-month tenure, and a cost-of-education allowance of \$10,500 per tenure year. Graduate Research Fellowships are awarded on the basis of merit. Disciplinary panels of scientists, mathematicians, and engineers convened by ORAU will review each applicant's qualifications.

Fellowships are awarded for graduate study learning to research-based master's or doctoral degrees in the fields of science, mathematics, and engineering supported by the NSF. Applicants must be citizens, nationals, or permanent resident aliens of the United States at the time of application. Applicants must be in the early stages of their graduate study in science, mathematics, or engineering.

In assuming the responsibility for the support services for this flagship program, which has assisted thousands of outstanding U.S. scientists and engineers, Oak Ridge Associated Universities affirms its dedication to maintaining the high quality and reputation of this national competition achieved in its 49 years of existence.

COCC adds four new instructors

Four new instructors have joined the faculty of Central Oregon Community College for the 2000-01 academic year, according to Bart Queary, COCC's vice president for instruction.

"I'm delighted with the quality and high-level training of the people the college has attracted," said Queary.

Kelly E. Allen will teach geographic information systems. She earned a bachelor's degree in biology and geography from Florida State University in 1994, a master's degree in geography from the University of Alabama in 1996 and a doctorate degree in biology from Texas Tech University in 2000. She has worked as a half-time research assistant and GIS analyst for Texas Cooperative Fish and Wildlife Research Unit since 1996 and has taught part time at Florida State, the University of Alabama and Texas Tech.

Brian N. Allen will teach geography. He earned a bachelor's degree in geography at Florida State University in 1994 and a master's degree in geography at the University of Alabama in 1999 while concurrently

completing a master's degree in public administration from Texas Tech University. He expects to complete his doctorate in education by the end of 2001.

Sue Kretschmann will teach nursing. She earned a bachelor's degree in nursing from San Jose State University in 1982 and a master's degree in nursing from San Francisco State University in 1995. She has worked at University of California-Stanford Health Services since 1982 in the high-risk orthopedic medical-surgical unit and as assistant project manager and clinical team leader. She is also a contributing author of "Maternity and Gynecological Care."

Anne Walker will teach health and human performance. She earned a bachelor's degree in physical education and a master's degree in exercise science from Eastern Washington University. She is a certified ski instructor as well as an instructor for the American Red Cross Emergency Response. She is experienced in teaching behavioral strategies and models related to health education and promotion.

NGAkids posts Children's website

The National Gallery of Art has launched NGAkids, a children's Web site, which can be reached at www.nga.gov/kids or via the Gallery's Web site home page at www.nga.gov.

Developed by the Gallery's education division, NGAkids features stories, activities, and information on the Gallery's collections, along with an animated musical tale called Lizzy and Gordon Visit Sculpture Garden. The site also links to family-oriented resources, events, and publications suitable for children of all ages.

"NGAkids invites young people to explore the nation's art through a Web site the Gallery designed especially for them," said Earl A. Powell III, director, National Gallery of Art. "We feel it is critical to take full advantage of the opportunities we have with the Internet to reach out to the

younger generation. We hope to capture their imagination and introduce them to the principles of art history."

Lizzy and Gordon Visit the Sculpture Garden is an animated musical adventure for kids seven to ten years old. Lizzy and Gordon Visit the Sculpture Garden follows a brother and sister as they encounter works of art in the National Gallery's Sculpture Garden, a 6.1-acre site that opened to the public on May 23, 1999. The story can be viewed and read in a linear fashion, or an interactive approach can be used. Information on each of the seventeen sculptures located in the Sculpture Garden, for example, can be found by clicking on one of the images on the overview map. Along with its visual presentation, the story is also narrated and is accompanied by music.

Mountain View Hospice invites you to attend our Bereavement Recovery Seminar

Mondays, Noon to 1:30 p.m.

September 25 to October 30

In conference room A, (on the main level of the hospital)

Bereavement is one of the most difficult times in a person's life. As with most challenges we face, it is easier to cope with it if we know what to expect, are not alone in the process, and have enough support. To this end, we are offering this free six week seminar for those who have lost someone through death.

For more information, or to pre-register, please call the hospice office at 475-3882, ext. 2310.

Fall foresight from Warm Springs COCC

Seems like everywhere you look someone is being affected by the "back to school" fever. Warm Springs COCC is no exception.

For the Fall 2000 Quarter, whose first class day is just a whisker away - September 18 - a full menu of classes is being presented. These offerings represent a selection of educational opportunities, which are suitable for a wide array of learners. All classes will take place here in Warm Springs.

Options range completely across the spectrum from ABE/GED to sophisticated college British Literature courses. Delivery avenues also show great variety. In some instances college certified instructors or professors will be here on the Rez in person to provide instruction. In other cases classes will be delivered to Warm Springs electronically using microwave technology and television or computer modem.

Specific details about classes are as follows:

GED & Adult Basic Education-sign up is 9:00 a.m. September 19. Students must register in person with the instructor.

High School Completion can also be achieved through the GED instructor registration, with the instructor at 9:00 a.m. September 19. This option is best suited to students who have 2 or fewer high school credits to pick up.

Credit classes—There are 14 to choose from. Samples include: intro to business, marketing principles, world history, English composition, how young children learn. Students have already signed up for eight menu items. Registration may take place on-line anytime or in person September 13.

Remedial classes—basically designed to help folks make the transition from early high school level to

college entry academic skill level. This class is ideal for individuals whose skills are rusty or for those who never really got it the first time.

Two classes offered:

Math 20 pre algebra—evening class September 18, 6:00 to 9:00 p.m. Register anytime.

Writing 20 basic writing I—evening classes, September 21, from 6:00 to 8:30 p.m. Register at any time.

All classes mentioned above will take place in the Tribal Education Branch building.

The Warm Springs COCC office is also located there. Office staff members, John and Marilyn will be happy to assist students by providing class schedules, college catalogues, advice about educational options and in making determinations about academic readiness.

Questions? Need additional quick assistance? Call 553-1428.

High Risk Kids workshop set for Oct.

High Risk Kids workshop is scheduled for October 17-19 at the Best Western Executive Park Inn, Phoenix, Arizona. This three-day workshop will help answer these and other important questions.

Who are these high-risk kids?

Where do they come from?

How do they get this way?

Why do they appear so angry?

Why do they seem to be so self-destructive?

What is missing in their lives?

What is the adults' role in this problem?

How can we as adults help our kids?

Who should attend?

This workshop is designed for family service workers, ICWA, community leaders, parents, educators, counselors, Drug Elimination Program staff, health care professionals, elders, law enforcement... any adult who is concerned about our youth, their families and communities. **Why should you attend the high-risk kids workshop?** In this workshop, participants will:

Learn about High Risk Kids, how to identify their signs and symptoms and how to better understand

them. **Focus** on issues that contribute to kids becoming at-risk, particularly the key roles that family and community play.

Look in-depth at family system dynamics, family addictive processes, abuse, neglect, and abandonment issues; and the destructive impact these have on children.

See how unresolved generational and cultural issues have affected today's generation, and what can be done to break this negative cycle in families and communities.

This workshop will produce new values, skills and attitudes; challenge outdated belief systems; and create a higher level of understanding, respect and appreciation for human diversity.

By developing a new and great awareness, we can create a more compassionate and sensitive approach to working with at-risk youth, their families as well as one another.

As we work toward building more open communication, trust and true expression of our own feeling self, we will learn how to embrace a truer sense of teamwork, cooperation and the collective spirit needed to

impact at-risk youth, their families and the community.

By becoming more nurturing, supportive, caring, humane, trusting, tolerant, and understanding of one another; we can begin to move forward positively and start breaking destructive generational cycles.

This unique workshop will include lecture, discussion, group and personal interaction, role-play, videos, experiential processes, practical application techniques, and challenging, interesting activities.

Partial attendance and participation is neither advised nor encouraged as the subject matter and topics covered are interconnected. Please make a personal commitment to full participation and attendance.

Tuition: \$375

Tuition includes 20 hours of training, course materials, and free refresher session. Payment must be made prior to or at the beginning of the workshop by cash, check, purchase order, or direct billing authorizations unless other arrangements have been made.

For more information call 1-800-780-7230.

Lecture set for October 8

As part of Oregon Archaeology Month activities, The Museum at Warm Springs hosts a public lecture on an extensive project, which documents petroglyphs and pictographs. The presentation by James W. Henderson provides a rare glimpse into symbols and images seldom seen so clearly. Pictograph and petroglyphs paintings come alive through combined polarized light photography and cutting edge digital enhancement. The Henderson Cross Polarized Enhancement Procedure reveals multiple layers of pigment on porous surfaces providing unparalleled detail of ancient pigments. The process and Mr. Henderson's two years of documentation reveal much of the Confederated Tribes of Warm Springs pictorial legacy on their ceded

lands. These are hybrid images revealed through the photographic and scientific processes and provide rich detail. The program shows a substantial assemblage of color images and Henderson's joys and trials in documenting them.

The research project and lecture have been made possible by a generous grant from the Meyer Memorial Trust. The presentation is Sunday, October 8, 1:00 p.m. at The Museum at Warm Springs, 2189 Highway 26, Warm Springs. Attendees from the Portland area are invited to enjoy Kah-Nee-Ta Resort on Saturday evening and a round of golf Sunday morning (541-553-1112). The Museum is open 362 days a year 9-6 in summer, 9-5 in winter. For information call 541-553-3331.
