

A sunny Fourth of July

Dave McMechan photos

Warm and sunny weather greeted the annual Warm Springs Fourth of July Parade Monday. The parade was followed by a community picnic at the Community Center and fireworks after the sun went down.

Scoping meetings for 2007 sale

Timber Committee and the Project Interdisciplinary Team will host two meetings to gather tribal member comments on the proposed 2007 timber sale.

The first meeting is scheduled July 11 at Agency Longhouse for Agency and Seckseequa districts. There will be a meeting July 13 at Simnasho Longhouse for Simnasho District.

A meal will be served at 6 p.m. prior to each of the meetings. The actual meetings will begin at 7 p.m.

Representatives from Timber Committee, Forestry and the Natural Resources Branch will show pictures of current conditions in the project area and discuss opportunities for timber harvest with the audience.

Tribal member comments will be used to develop a project assessment for the sale.

The proposed 2007 timber sale will be in the upper Warm Springs watershed. Timber harvest would occur on approximately 3,000 acres and the anticipated harvested would be 38.2 million board feet.

Dental program to benefit infants

New mothers, cavities in your child's teeth start as infections passed from your mouth to your baby because of the close contact you have with your baby.

Your health care center is treating new moms with a new dental coating to try and prevent

your mouth germs infecting your baby, avoiding cavities in your child.

The Confederated Tribes of Warm Springs strongly supports this new program, and will pay you for your time and costs of participating in it. All appointments will be scheduled at a time

convenient to you.

Call Lila Martinez at 541-553-2462 to learn more about this new program.

This message is provided by the Warm Springs Health and Wellness Center.

Seminar on livestock breeding

Oregon State University Extension Warm Springs is presenting an introduction to the principles of artificial insemination (AI) in beef cattle.

The seminar is at 2 p.m. this Thursday, July 7 at the Squiemphen Ranch at Sidwalter. All tribal members are invited.

Artificial insemination is a way to breed livestock with options. Affordable straws (genetic material from males) can be ordered, and cows can be

inseminated at any time of year, depending on herd fertility, and your desired calving time. It is cost effective and can potentially improve the genetics of your herd.

At the seminar, Henry Jaeger, AI technician for Select Sires, will be on site to AI cows and explain the principles of AI, fertility cycling, conception rate and genetics that will be discussed. For information, call OSU Extension at 553-3238.
