## Oregon covid numbers

Covid-19 claimed six more lives in Oregon recently, raising the state's death toll to 1,155, according to the Oregon Health Authority.

Recent data shows the state reported 1,048 new confirmed and presumptive cases of covid, bringing the state total to 93,853.

The new confirmed and presumptive covid cases reported this week are in the following counties: Baker (4), Benton (21), Clackamas (112), Clatsop (3), Columbia (15), Coos (11), Crook (7), Curry (14), Deschutes (39), Douglas (20), Hood River (13), Jackson (90), Jefferson (17), Josephine (11), Klamath (28), Lake (1), Lane

(88), Lincoln (12), Linn (24), Malheur (4), Marion (150), Morrow (4), Multnomah (172), Polk (15), Tillamook (1), Umatilla (36), Union (2), Wasco (9), Washington (108), Yamhill (17).

Oregon's 1,150th covid death was a 74-year-old woman in Jackson County.

The 1,151st death was a 91-year-old man in Josephine County.

The 1,152nd covid death: A 76-year-old woman in Linn County. The 1,153rd Oregon covid death: A 98-year-old man in Marion County.

The 1,154th: A 94-year-old woman in Washington County. The 1,155th: An 87-year-old man in Washington County.

## Benefits of healthy posture

by **Alicia Oberholzer**  
Physical Therapist  
W.S. Holistic Health

A healthy posture is a reflection of the body's strength, flexibility and mobility.

It can be influenced by daily habits including how we work, recreate, sleep and travel.

An ideal posture allows us to sit, stand and move efficiently. While posture is often subconscious, there are many ways that we can improve it.

### Move

Being in one position for a prolonged period of time can cause excess pressure and stress on certain joints and body tissues.

Changing position often can help to mitigate these effects.

Taking a two minute break every hour to stretch or walk can make a big difference in overall pain and stiffness.

### Position

Set yourself up for suc-

cess. If you know that you are going to be in a position for more than 30 minutes, be extra mindful of how you set up your chair, computer or phone.

Try to keep your neck neutral, back supported, and eyes looking ahead.

### Exercise

Postural muscles are key in supporting good alignment, reducing stress on joints, and minimizing chronic pain.

For specific postural strengthening exercises, tune into this week's episode on the Warm Springs Holistic Health youtube channel.

*If you have further questions, feel free to contact a physical therapist at Warm Springs Holistic Health for more information.*

*Warm Springs Holistic Health is open 8 a.m. to 5 p.m., Monday through Friday. Appointments are required. Call 541-777-2663 to learn more. The center, a program of Managed Care, is located on campus next to the courthouse.*

## Latest IHS Covid-19 testing data for Indian Country

The Indian Health Service updated its coronavirus data through early to mid December. The data reflects IHS covid testing across Indian Country.

According to the data, 118,046 tests have returned positive for Covid-19. That represents an increase of 1 percent from the 116,858 cases previously reported by the IHS.

Altogether, 1,482,313 coronavirus tests have been administered within the IHS through the firsts third of December. That marks an increase of nearly 0.7 percent from the week prior.

Since mid-October, the IHS has been providing additional information about the spread of the coronavirus within the sys-

tem.

The cumulative percent positive column shows the historical Covid-19 infection rate, meaning the number of tests that have returned positive since the onset of the pandemic.

Based on the cumulative percent positive, the highest rates have been seen in the Navajo Area (14.8 percent), the Phoenix Area (13.2 percent), the Oklahoma City Area (10.5 percent), the Albuquerque Area (10.4 percent) and the Great Plains Area (10.4 percent).

The first two regions include the state of Arizona, indicating a disproportionate toll of Covid-19 in the state.

The 7-day rolling average positivity column of-

fers a more contemporary look at the impact of the coronavirus. The data shows where Covid-19 cases have been increasing recently.

Based on the 7-day rolling average positivity, three regions have seen dramatic increases in Covid-19 cases. They are: the Phoenix Area (17.6 percent), the Navajo Area (17.3 percent) and the Oklahoma City Area (16.4 percent).

Overall, 8.6 percent of IHS tests have been positive since the onset of the pandemic, the data shows. Meanwhile, the 7-day average has started to decrease after growing steadily over the last couple of months. It now stands at 11.6 percent.

The data, however, is incomplete. While 100 percent of facilities run directly by the IHS are reporting data, only 33 percent of tribally managed facilities and 44 percent of urban Indian organizations are doing the same.

Based on the above calculated figure, nearly 57.9 percent of American Indians and Alaska Natives have been tested for the coronavirus since the IHS began reporting data in March.

However, based on the actual IHS user population, 89.1 percent of Native Americans have been tested for the coronavirus since the IHS began reporting data in March.
