Breakthrough covid cases

The Oregon Health Authority's most recent update on Covid-19 breakthrough cases found that 71 percent of reported covid cases occurred in unvaccinated people.

Twenty-nine percent of all cases were among vaccinated people.

The average age of the breakthrough cases was 45. Forty breakthrough cases involved residents of care facilities, senior living communities or other congregate care settings. There were 76 cases in people ages 12 to 17.

To date, there have been 39,686 Covid-19 vaccine breakthrough cases in Oregon. The average age of all cases is 48. Breakthrough cases have been reported in all 36 counties.

Cases of Covid-19 are far more common in unvaccinated people. The report shows that the rate of covid in unvaccinated people is four times higher than in vaccinated people. To date, 4.4 percent of all vaccine breakthrough cases have been hospitalized and 1.1 percent have died. The average age of vaccinated people who died was 80.
