TRIBAL RESERVATION PLAN

As part of the Reservation planning effort, the Tribe has prepared a socio-economic questionnaire which is being administered to all tribal households. Those of you who live in our six-county service area have probably already been interviewed by a tribal member. For those tribal households outside our service area, a questionnaire has been mailed. The Tribal Council requests that you fill out and return this survey form as quickly as possible, since the data is critical to our future planning efforts. One questionnaire per household has been sent and is to be completed by the head of household. If your household has not received a questionnaire by the end of November, contact Cheryle Kennedy at the Tribal Headquarters, and we will see that one is sent to you immediately.
