HOUSING

The Indian Health Service Construction Section does provide water supply and waste disposal systems to tribal members in the service area whose homes meet certain criteria.

If you have purchased a new home or mobile home and it is in standard (decent, safe, sanitary - general construction meets local codes, heating system in good condition, properly installed plumbing system, safe and properly functioning electrical system of adequate size) condition, you may qualify for facilities.

If your home has been upgraded or rehabilitated through the use of any federal program or any of your own resources and meets the standard criteria, you may qualify for facilities.

There may also be some people who are exceptions to these rules who may qualify for the program.

If you are in need of any of these services, contact the tribal housing program to obtain an application.
