

Faulty HVAC unit forces lodge evacuation

A malfunctioning heating, ventilation and air conditioning unit on the roof of Spirit Mountain Lodge forced the evacuation of guests on Sunday, Sept. 11.

The report of smoke in an elevator shaft between 6:30 and 7 a.m. prompted West Valley Fire District to dispatch two engines and a water tender to the lodge. Sheridan and Amity fire districts also responded with three rigs total.

As a safety precaution, 378 lodge guests were evacuated and smoke was detected on the fourth and fifth floors. Eventually, the source of smoke was tracked to a malfunctioning HVAC unit on the roof. The smoke was cleared and fire crews released.

There were no injuries. Casino Facilities Director Ron Reibach said the culprit was a single motor that cost about \$300. It had already been replaced as of Monday, Sept. 12. Casino Marketing Director Shawna Ridgebear said casino staff contacted guests to ensure they were taken care of during the evacuation. ■

What is an internship?

An internship (full-time/part-time) is a real-world experience related to your career goals and interests. Internships can be what helps you stand out in your job interviews after college. Most employers look for a combination of formal education and experience. It may, but does not have to be related/connected to your academic major or minor.

Not only are you gaining valuable hands-on experience, you are also networking and making connections to professionals in your future career field. CTGR Higher Education encourages students to explore internship opportunities to supplement their college education. ■
