EDITORIAL.

Another strike bobs up on the wave of prosperity and 20,000 sheet mill workman went out last Saturday. This, added to the strike of the Virginia coal miners, and the machinest strike, makes a big fleck on the wave indicative that the millennium of labor relations with capital is still delayed.

The Manila frauds have been whitewashed and Harold M. Pitt, manager of Evans & Company, government contractors, acquitted. These whitewashing occasions are conspicuous and of frequent occurence, and remind us, that once upon a time a nation called Jews crucified a just man and turned loose a thief and a robber, and it is a singular coincidence that the territory comprised in the holding of that people have been overrun by thieves and robbers for nearly two thousand years.

The Seventh National bank of New York has met with a smashing wave of prosperity. The institution loaned a stock brokerage a million and a half dollars on securities that are said to be worthless, and now the bank is in the hands of the Controller of Currency with liabilities over six hundred thousand greater than its asserts. Wall Street brokers are adepts in selling golden bricks, only the bricks in anticipation, are, like the tiger's claws, cleverly concealed and the victim is mangled before the instrument of destruction is discovered. Mammon's caprices make one man glad and wound many.

The machinists' strike is reported to be nearly over and that the machinists are returning to work unconditionally. This leaves relations between employers and employes about the same as they were before the strike commenced, and about the only thing that is demonstrated by strikes is this: That labor has not the same right to combine for its own protection which is granted to capital. It is true that labor creates capital, but the creature after the creation is accomplished becomes divine instead of the creator. It is an other example wherein the creature tries to steal the kingdom.

President McKinley has determined that the northwest shall receive a visit from him, and gives out that he will yet come to Oregon and other states which he failed to visit on his western trip. The *Oregonian* in speaking of the matter says: "President McKinley's determination to make another Western trip in 1901 is doubtless promoted partly by the apparent dangers of democratic success in the November elections. The President is a loyal republican and of the revivifying effect of his tours upon the party there need be no doubt. Perhaps there is no doubt, either, as to the need of such aid as he can render in this way."

There is a new conquest to be made, and another foe to be overcome. The American Baldwin Zeigler expedition, comprised of the leaders, and 40 men, among whom are many scientists, vow that the American flag shall wave from the North pole. The North pole, when mounted with a short flagstaff, may be an excellent place upon which to unfurl Old Glory but there is a cold shouldered giant entrenched in that seductive locality who, so far, has proved invincible. The question arises: Will the benefits to science, arising from a discovery of the North pole, justify the sacrifices that have and will be made in obtaining the desired end.

The Ohio political machine has made another revolution upon its axis and ground out the state ticket as follows: For governor, George K Nash, the present incumbent; for lieutenant governor, Carl N Nipper; Supreme Judge, J L Price; attorney general, John M Sheets, renominated; clerk of the supreme court, L E Emerson; state treasurer, I B Cameron, and W G Johnson was renominated for member of board of public works. Mark Hanna presided and had the organization under perfect control. Hanna is very probably fishing for a presidential nomination, and the question bobs up; how many million dollars can he raise to secure his own election, having established his ability as a successful president maker.

J Pierpont Morgan and nine other millionaires chartered the promenade deck of the steamship Deutschland to return to New York from a visit to the Eastern continent. Doubtless there is a big scheme on and by the time the party reaches New York Morgan will have completed a trust to control the air, water and sunshine supply of the earth.

The Eastern states were visited by a hot wave, last week, which prevailed generally over the country from the Mississippi river to the Atlantic ocean during the whole week, causing many death from heat. It was still holding sway on Saturday while people of the whole district were anxiously desiring thunderstorms to cool the atmosphere. Bandonians some times grumble at the Northwest wind, but they are free from excessive heat, and never swelter from extremely hot weather.

J. Pierpont Morgan is again planning. This time it is said he is desiring a trust that will control the shipping of the Americas. The London *Express* asserts that "Morgan is convinced that a nation's merchant marine, like its navy, should be under one hand." That journal might just as truthfully have stated that Morgan has long since been convinced that both continents should be under the control of one hand, and that Morgan's hand is the one that he desires to be in exclusive control.

Two Severe Accidents.

ROSEBURG, June 26.—Information was received here yesterday of two serious accidents which occurred in the vicinity of Olalla Saturday. A. E. McCulloch, a rancher, while raking hay, was thrown in front of the rake and rolled or dragged under the implement for a long distance by the frightened horse, which finally ran away. Mr. McCulloch was severely bruised and cut, and his condition is said to be serious.

On the same day, Mrs. Fred Van dever was thrown from a horse she was riding and narrowly escaped death. The horse ran after throwing her, but her foot remained fast in the stirrup while she was carried around a narrow ledge over a steep, rocky precipice. In its wild efforts to free itself from the rider the horse began kicking and struck the woman's shoe, tearing it off, and this released Mrs. Vandever, who was picked up unconcious and found to have sustained severe injuries about the back. She will probably recover, however.

Liquid Air Cremation.

AUGUSTA, Ga., June 26.—An experiment in cremation by means of liquid air is to be made before the Funeral Directors and Embalmers' association of Georgia in annual convention here. The convention opened this morning with members present from all parts of the state. The liquid air experiment will be conducted by Professor Barnes of Chicago and the result is awaited with much interest.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

Sunday Welcome: The squall that dismantled the Shamrock II is not a circumstance to what is in store for her when she meets the American boat in an endeavor to lift the cup.

Sunday Welcome: John Davis was picked up on the streets of Wheeling, W. Va., pronounced dead by two doctors, sat upon by a coroner's jury, which found that death was due to heart failure, removed to the undertaker's and in ten minutes sat up and sang the doxology, was hustled off to court and fined $5 for drunkenness. The doctors and the corner's jury were not tried.

A French writer for La Nature posesses a dog which having been born without hind legs, has, of its own accord, learned to walk and even to run rapidly on its two front legs. It maintains itself in its upright position with perfect ease, turning stopping, standing at rest, eating its food and performing all ordinary acts with its hind quarters poised above its head, as completely master of its equilibrium, says its owner, as a man is. Once in about fifteen minutes, on the average, it rests its hind quarters on the ground, or, by preference, on some slightly elevated object. It is not more fatigued by exercise than any ordinary dog.
