Railroad Gossip. Senator Clark is in Los Angeles, and has given it out that the delay in work on his Salt Lake-Los Angeles line is due to the inability to get the material for construction delivered in time. There is a growing feeling in the railroad world that the Clark plan is merely to get a line from Los Angeles to one of Mr. Clark's Southern California mines, and there construction will cease. Operations in the Coos Bay country seem to be stirring matters up in that direction. Just at present there are many Salt Lake financiers and men of influence dropping into Portland to look over the ground of the Great Central Railroad's plans and ascertain, among other things, from which direction the Oregon seaport line will approach the Mormon city. Land speculators from the intermountain state are arriving in Portland daily, and some of them are kept busy denying any special object of their trip here coincident with the making public of the plans of the Great Central, at the head of which is a former Salt Lake man of considerable prominence, L. D. Kinney. It is understood there have been heavy purchases of land made in Southern Oregon within a recent time. The financiers of the intermountain state have evidently become greatly interested in Coos Bay and its railroad prospects. It is believed that the Los Angeles road is being headed off by the plans of a combination to reach tidewater in Southern Oregon. Much interesting gossip is flying around concerning the backing of the Great Central. The Missouri Pacific Road is frequently conjectured as being the probable backer of the far Western enterprise. That enormous system needs a Western outlet, and along with it there are other great Middle Western lines that might be in a combination to open the Salt Lake gateway. The situation as regards several Eastern lines at Denver is unsatisfactory, and it might be that the Great Central is planning to get to the Pacific Coast for the accommodation of a system or a combination of systems which may reach Denver and Salt Lake. The Rock Island Road is stated to be an important factor in the situation at Denver, inasmuch as its traffic arrangements are not the most complete, and the Rock Island people would see much to their future interest in being a party to the Great Central combination. Whatever influence is back of the Great Central's mysterious "buying" about Coos Bay will soon come to light, it is thought. A YOUNG LADY'S LIFE SAVED. At Panama, Colombia, by Chamberlain's Colic, Cholera and Diarrhoea Remedy. Dr. Chas. H. Utter, a prominent Physician, of Panama, Colombia, in a recent letter states: "Last March I had as a patient a young lady sixteen years of age, who had a very bad attack of dysentery. Everything I prescribed for her proved ineffectual and she was growing worse every hour. Her parents were sure she would die. She had become so weak that she could not turn over in bed. What to do at this critical moment was a study for me, but I thought of Chamberlain's Colic, Cholera and Diarrhoea Remedy and as a last resort prescribed it. The most wonderful result was effected. Within eight hours she was feeling much better; her inside of three days was upon her feet and at the end of one week was entirely well." For sale by C. Y. Lowe. Looking Toward Coos. Just now the Portland press seems to have great expectations for Coos bay and this section in general, and it would seem that there is much more than talk behind the schemes and that the near future will give this part of the coast easy access to the interior. The following is from the Oregon Daily Journal: General Manager Kinney, of the Great Central Railway, announced to day positively that the stock of the Empire Construction Company, an auxiliary of the Central, has been all taken and there is not a dollar remaining on the market. Of the total, 51 per cent is held in Portland, and 49 was taken to day by Tacoma parties, who are old railroad builders. The offices of the Empire Construction Company will be transferred on the steamer Alliance to Coos Bay. H. D. Jerrett, first assistant chief engineer of the Great Central, will occupy the offices of the construction company. Interest in the enterprises herewith connected is deepened by these announcements.

ARRIVED. Aug 18.—Schr Albion, Anderson, 18 days from San Francisco, to K H Ross. Dumped on the Bar Again. W. M. Vandecar and James Costello took a quick bath on the bar Saturday morning, that is they went bathing very abruptly, although the bath was rather prolonged as they were in the water some twenty minutes, before being rescued. They had started for the fishing grounds and had crossed out until they thought they had cleared the bar when a large swell rose before them. The boat passed through the top of the breaker and turned over. The life-saving crew went to their assistance and soon had them safe. The experience was somewhat severe on Mr. Costello, as he was looking quite cold and blue on returning, but was out and around as usual in a few hours. Vandecar did not seem to have suffered any particular inconvenience. This makes two or three times that Mr. Vandecar has been dumped into the ocean here while Mr. Costello has had some seven or eight such experiences.
