These Tablets are the most prompt, most pleasant and most reliable cathartic in use. For sale by C. Y. Lowe. Bandon Woolen Mills Going. Bandon is to lose her woolen mills. It is to be taken to North Bend to boom the new town, and Bandon can bustle for other industries. In order to secure the mill so as to give employment and add population to the town and secure a payroll to swell the business which is necessary to permanent town building the citizens of Bandon raised a bonus of \$15,000 which was the consideration that induced Messrs. Clark and Palmer to build the mills. That the mills should be in operation five or six years was all the security that was exacted in consideration of the handsome bonus given, it being supposed at that time that if the venture proved a success, that good faith on the part of the recipients would be sufficient to retain the mills. It appears, however, that Bandon is to be left, and as she has no strings on Mr. Clark, he can do as he pleases. Mr. Simpson who is interested at North Bend has offered inducements which have been accepted, and woolen mills having twice the capacity of the Bandon mills are to be erected there. Other machinery equal in capacity to the Bandon mills is to be instituted at North Bend, and then the remains of the defunct Bandon mills is to be placed in operation by their side. It does not speak overly well for the new town that she has to build herself up at the expense of a sister town, as her projector should have used his own means, and not reached out after the \$15,000 which Bandon donated to better her own conditions in building up her business. Mr. Clark has the legal right to accept the offer which has been made to induce him to move to North Bend, but it would have looked better upon the part of those offering the inducement to have gone to work, built their mill and found a man to run it, or else build it independent of the Bandon concern and let Mr. Clark operate both. However, such things as these belong to the competitive system, and Mr. Clark only did, in accepting the offer, what most other men would do under the same conditions. That it hurts Bandon is sure, but she can and, no doubt, will reconquer herself by gaining some other industry. It takes union of purpose and energy to build a town and Bandonians should pull together. A recognized authority—The Weekly People—The Oregonian.

The Benefit Society, given for the benefit of S. D. Burrows, last night was a very successful affair. A good program had been arranged and was successfully carried out. The house was well filled and although we could not learn the exact receipts, before going to press this morning, it is said that they exceeded one hundred dollars. Death of L. E. Palmer. Died at Bandon, Oregon, February 17, 1903, L. E. Palmer, aged 63 years. Deceased was a native of New York state and served something over two years in the army during the rebellion. He has been a resident of Bandon most of the time for several years past, was a member of the Bandon Post, G. A. R., the members of which took charge of the funeral, Rev. W. H. Myers delivering the discourse. Mr. Palmer has been a great sufferer for some time. He leaves a daughter, Mrs. W. C. Sanderson, here, and a son who lives in Texas, and numerous friends to hold him in remembrance. Commenting upon J. Pierpont Morgan's statement that he gathered in the Louisville & Nashville railroad because he wanted to prevent John W. Gates from making it the instrument of his evil purposes, the St. Louis Globe Democrat says: "Morgan's only thought was to serve the public. This is a touching example of the merger man's sheer love of his kind. But isn't it curious? In the course of this touching transaction he touched the stockholders for \$2,100,000 for the house of Morgan. Curious, yes, but the coincidence is manifest in all these mergers. They are all conceived in the purest spirit of benevolence, achieved in the noblest motive of 'otherdom' and consummated with huge profit to the merger man. What was unselfishly intended for the good of all falls unaccountably into the possession of a few." Famine Stricken People in Dalmatia Dying Daily. VIENNA, Feb. 10.—The death of thousands of her population daily attests the severity of the awful famine now pervading the province of Dalmatia. To add to the intensity of the suffering of the starving people, Typhus fever has broken out among them, and as sufficient medical assistance is unobtainable, the horror of the famine is almost indescribable. Slaves of all countries are being appealed to for aid through the leading newspapers. Tendency of the Times. The tendency of medical science is toward preventive measures. The best thought of the world is being given to the subject: It is easier and better to prevent than to cure. It has been fully demonstrated that pneumonia, one of the most dangerous diseases that medical men have to contend with, can be prevented by the use of Chamberlain's Cough Remedy. Pneumonia always results from a cold or from an attack of influenza (grip), and it has been observed that this remedy counteracts any tendency of these diseases toward pneumonia. This has been fully proven in many thousands of cases in which this remedy has been used during the great prevalence of colds and grip in recent years, and can be relied upon with implicit confidence. Pneumonia often results from a slight cold when no danger is apprehended until it is suddenly discovered that there is fever and difficulty in breathing and pains in the chest, then it is announced that the patient has pneumonia. Be on the safe side and take Chamberlain's Cough Remedy as soon as the cold is contracted. It always cures. For sale by C. Y. Lowe. Pay Up Notice.
