A considerable number of residents of Bandon and vicinity were called to Coquille City, this week, to attend circuit court, some going as jurors others as witnesses, while in one or two instances the principal of some action at law was represented. A dead whale floated on the north beach a few days ago and has attracted considerable attention since, many persons having visited the place to look at it. It is of the sperm whale species, and measured 61 feet in length. On Monday night it was pushed off the beach and went to sea again, and as it is rather an uncanny thing to have lying close to town it is to be hoped that it will not come in where it will cause trouble. It has since the above was written, come in just south of the south jetty, and will probably have to be burned.

English Press are Kicking. New York, April 23.—Almost every newspaper in the country is urging the government to have nothing to do with the Bagdad railway scheme, cables the Tribune's representative in London. The terms of the convention defining the conditions of the concession for the construction of the line make it absolutely clear that its control will rest in German hands, and Mr. Balfour's supporters in and out of Parliament are consequently unable to understand why the Foreign Secretary has not promptly declined the German invitation. A rumor is current to the effect that England is now paying the price of German neutrality during the Boer war, and there is talk of a secret agreement that binds this country hand and foot to Germany, and commits it to an unknown vista of humiliations, entanglements and perils. The Unionist newspapers are alarmed, and Mr. Balfour is warned that acquiescence in the Bagdad scheme is not to be tolerated. A Relic Of The Past. The little 5 year old daughter of Will Johnson while at play near her home on Elk River a few days ago found what she called "fanny piece of iron." Her grandfather investigated and found it to be the barrel of an old army musket, such as was used by the settlers here during the Indian war of '55-'56. An older tree 14 inches in diameter had grown over a portion of the barrel. A silver sight, as bright as when new, was on the barrel and an exploded cap on the tube. The stock had long since decayed, but after digging down a few inches Mr. Johnson found the iron of the stock and also a badly decayed iron ramrod. Under what circumstances, and by whom the old gun was left never found by the little girl, will never be known, but there is no doubt but that the gun did its part some 40 years ago in helping to civilize and colonize the then wild and woolly west.—Port Orford Tribune. Danger of Colds and Grip. The greatest danger from colds and grip is their resulting in pneumonia. If reasonable care is used, however, and Chamberlain's Cough Remedy taken, all danger will be avoided. Among the tens of thousands who have used this remedy for these diseases we have yet to learn of a single case having resulted in pneumonia, which shows conclusively that it is a certain preventive of that dangerous disease. It will cure a cold or an attack of the grip in less time than any other treatment. It is pleasant and safe to take. For sale by C. Y. Lowe. Important News Notes. TUESDAY April 21.
