"Mrs. Cashingor's baby was so ill that she realized that it would be necessary to make a trip to New York to receive expert medical attention if she hoped to save the child's life. But to travel that long distance the child had to have milk. Milk wouldn't keep fresh more than a few hours. So there she was, kept back from making the trip merely because she could not supply the child with fresh milk.

YELLOWSTONE PARK."

One Meets With Nature's Surprises There at Every Turn.

Probably no area of equal extent contains so great a number of natural objects capable of arousing wonder, enthusiasm and awe as are found

crowded together in the park. Its many scenic features of restful charm, found alongside areas of never ending activity, with weird, grotesque surroundings, surprise one at every turn. Yellowstone lake, the largest sheet of water in America at so high an elevation, with its indented shore line and 140 square miles of surface dotted with forested islands, presents to lovers of nature a series of picturesque landscapes unequaled upon any other inland waters. The far famed falls of the Yellowstone, with their unique and marvelous rock setting, and the Grand canyon, with its majestic outlines and brilliant coloring, are worthy of all the praise bestowed upon them and merit a separate descriptive article. More than a score of waterfalls and cascades, some of them of exquisite grace and beauty, pour the waters of mountain torrents and plateau lakes from the uplands to the lowlands. Many of them well deserve a visit, but their fame is obscured by the real marvels of the Yellowstone. Again, the fossil forests, so seldom visited, tell a most interesting story of a buried plant world, of explosive eruptions of mud volcanoes and the gradual piling up of erupted lavas and ashes. All these, enticing as they seem, appear insignificant when comcomposed of an applique cut from pared with the hydrothermal phenomewhite cloth and embroidered. The na displayed in geysers, boiling springs, hot lakes, solfataras and numberless fumaroles, which have gained for the park the appellation of the wonderland of America. Unquestionably it is this hot water treatment which the region has undergone that has developed most of the objects of interest and made the park famous the world over. Even the lake owes much of its attractiveness to its hot springs and paint pots, and the Grand canyon would lack its brilliancy of coloring

and its sculptured buttressed walls but for the long continued action of hot as well as cold water.-Arnold Hague in Scribner's.

Queer Tastes.

Speaking of mysterious tastes, that of a man who was recently before the magistrate at Greenwich is not very easy of explanation. Three weeks ago a legacy of £130 was left to him. The first thing he bought, it seems, was a set of billiard balls, and he now has nothing else left to show for the £130, which has disappeared at the rate of £43 6s. Sd. weekly, Why billiard balls? It is a singular and rather interesting form of craving. It is perhaps true that a billiard ball is one of the very few perfect objects produced by man. It is all of a piece, it is thoroughly homogeneous as regards material, and it is, or should be, faultless in form. Yetonly a strong strain of mysticism in the character would account for a man hungering and thirsting for billiard balls above all other earthly things .-London News.
