Coquille Drifts Partly Disabled
Astoria, Or., Dec. 2.—The schooner Coquille is drifting around the Oregon coast in a partially disabled condition, and was in distress for provisions and water for several days until sighted by the oil-tank steamer Whittier yesterday afternoon with signals of distress flying. It was off Umpqua when the Whittier sighted her, and running close alongside found that she was 42 days out of San Francisco for Coquille to load lumber, was short of water and provisions, and that for several days all on board had been on short rations. She had experienced all the storms of the past few weeks, and had all trace of her fore-sails carried away and her fore-rigging damaged.
Capt Dixon of the Whittier placed two weeks' provisions and water on board the Coquille, but her master refused further assistance, and said that as all on board were in good condition he would "make Coquille or land her some place." Captain Dixon says that while the Coquille was damaged some above the decks, she was not leaking, and her master seemed to be able to handle her without difficulty, and when he left she was heading off shore with the intention of heading back toward Coquille.
Her captain told Captain Dixon that he had been in company with the derelict Quickstep for a couple of days, and this was reported by the Whittier upon her arrival, but in the meantime the derelict had gone ashore at Yaquina Head.
The schooner Coquille showed up off the bar here last Friday and lingered awhile with her flag at half mast, and then sailed off toward the south. The tug was at Coos Bay at the time of her appearance here, and it was too rough for the station crew to risk a trip over the bar. It is supposed that she set her flag at half mast to indicate that she wanted assistance in getting in. The general opinion now is that she has gone back to San Francisco.
Christmas Goods.
In making your purchases for Christmas give William Gallier a call and you will find goods useful as well as ornamental.
Amongst his wares are Dishes and Fancy Dishes; Lamps and Fancy Lamps; Hobby Horses, Shoe Flies, Doll Carriages, Express Wagons, Bird Cages, Lunch Baskets, Telescopes, Canteens, Spectacles, Cheap Watches, Glass and Granite Ware. One of those nice stoves or a range will make your wife smile with contentment and pleasure.
Woolen Mills Growing.
The Woolen Mills building is beginning to take on a better appearance as time passes, and the time of its completion and operation does not look so far off as it did some time ago.
Yesterday saw the building under cover and enclosed, except the windows, and as the frames are mostly in place, it will take but a short time to put them in upon their arrival on the steamer Chico when she comes in.
The floors in the main building are laid and the second one in the L will soon be finished, the two first giving ample room to store the machinery upon its arrival. Work is moving forward as fast as possible, and it will not be long till the placing of the machinery will begin. Rock is now being hauled for the concrete foundation for the boiler and engines.
The outlook is very good for the mill to be in operation by the first of March or soon after, and Bandonians are congratulating themselves, and are beginning to look upon the removal of the old Bandon Woollen Mills Co. in the light of a blessing instead of a calamity, as had the first mill remained the latter would not have been attempted, and if the North Bend institution does not soon get a move on Bandon will be in the lead.
Revolution Imminent.
A sure sign of approaching revolt and serious trouble in your system is nervousness, sleeplessness, or stomach upsets. Electric Bitters will quickly dismember the troublesome causes. It never fails to tone the stomach, regulate the Kidneys and Bowels, stimulate the Liver, and clarify the blood. Run down systems benefit particularly and all the usual attending aches vanish under its searching and thorough effectiveness. Electric Bitters is only 50cts, and that is returned if it don't give perfect satisfaction. Guaranteed by C. Y. Love, Druggist.

A. J. Wilson, of Northern Curry, was in town yesterday, having come for the double purpose of business and a visit to his family.
E. E. L. Bedillion was a passenger to San Francisco, Tuesday, on the steamer Elizabeth, having business in connection with the Woolen Mills which called him there. King Bob is a restler, and Bandon is beginning to realize the efficiency of his efforts.
A Dawdling in Russia.
It is objected by the autocracy in Russia that the people ought not to have representative government, because they are not accustomed to it and wouldn't know how to manage it. But how is one ever to learn to swim unless he enters the water? Ignorance of the people throughout Russia is indeed profound; but there are many parts of the empire where there are men fit to take the lead, and the people of almost all Russia are close knit, racially, to those in other countries that have developed representative institutions. They belong to the northern and self-governing races of the world. But of course the call for a constitution and a congress will be met by the inveterate opposition of the ruling class.
But the call is made by those who know, evidently, what they want, and what representative government really means. It is a protest against "administrative arbitrariness and personal caprice;" it asserts the essential need of freedom of speech and of the press, of freedom of meeting and association; above all, that "it is unquestionably necessary for the national representation in the form of a specially elective body to participate in legislation," together with application of the principle that "no one shall be subjected to restriction of rights or to punishment without the decision of independent legal authorities."
The answer of autocracy in Russia is that this is the system necessary for other nations, as the United States and England, but not for Russia, because the people of Russia don't know how. But how are they to learn? Of course they will make blunders. If, however, no beginning is to be made, there will be no beginning of the end of despotism.
Autocracy in Russia will find, one day, that it is sitting on a mine, or a volcano, or at least on a gunpowder barrel. It is doubtful whether the demand for representative government in that great empire will ever be reached without the intervention of one of those terrible explosions that mark epochs in the history of the world. But the present movement is significant. Nothing like it has been witnessed heretofore in Russia. Enclosed begins to turn under Etna. Here for the first time seems to be a movement toward political liberty in Russia in line with the historic movements of Western Europe.—Oregonian.
A Costly Mistake.
Blunders are sometimes very expensive. Occasionally life itself is the price of a mistake, but you'll never be wrong if you take Dr. King's New Life Pills for Dyspepsia, Dizziness, Headache, Liver or Bowel troubles. They are gentle yet thorough. 25cts at Lowe's Drug Store.
