Southern Pacific Will Build from Drain to Coos Bay.

Official announcement was made yesterday afternoon from the office of General Manager O'Brien, that the Southern Pacific would build a branch from Drain. Douglas County, along the course of Elk Creek and the Umpqua River to the coast at Gardiner, thence south along the coast to Marshfield, opening the interior of Coos County to development and commerce as soon as the final surveys and right of way work can be completed. The route has been decided upon. The distance is 81 miles. The estimated cost for a standard gange line of first-class construction is

Coos County is one of the rich divisions of Western Oregon, comparatively slightly developed because of lack of transportation facilities, and has heretofore been obliged to trade 5 50 almost entirely with San Francisco.

miles..... A survey has been made by the Southern Pacific Company of a line from Drain, 167 miles south of Port land, to Marshfield, on Coos Bay. A satisfactory route has been found and the line is now being definitely located. The announcement was made at the offices of the Southern Pacific Company, yesterday, that as soon as the line was definitely located and right of way obtained, the work of constructing this line would begin.

This is one of the most important undertakings in the Northwest for several years, as the new line means tween the present line of the Southern Pacific and the ocean, the resources of which are enormous. The road will be about 81 miles in length, and will closely follow the waters of Elk Creek and the Umpqua River toward Gardiner, thence south along the Coast to Marshfield. It will have the distinction of being the first line to cross the Coast Range Monntains in Oregon, as well as the first one to penetrate the heart of one of the greatest timber belts in the world .-
