THURSDAY, NOV. 2, 1905.

In assuming the management of the Recorder we wish to say that we have no axe to grind, and have no other motive than to give the people of this community a newspaper that will work for the interests of Bandon and vicinity to the best of our ability. We have enough experience in the business to know that we cannot please everyone, so will not attempt to do so, but will endeavor to enlist the support and friendship of all who believe in living and let live; who believe in boosting, not knocking, and who believe in the future of Bandon and adjacent territory.

A newspaper properly conducted and supported is a great agency for good in any community. We will endeavor to merit support, and hope that it will not be necessary to get out with a club in order to get it.

Politically, the Recorder will be designated as Independent Republican, but we will deal but lightly with politics, believing that a local paper's first aim should be to give the home news, and that will be the paramount issue with the Recorder.

We hope the people in this part of the county will be liberal in their patronage in order that the paper may be improved and its field of usefulness enlarged. We will endeavor to put forth just as good a paper as our patronage will justify. We cannot make it a success without the aid of the people. We hope to merit the necessary patronage, and leave you to be the judge.

Col. Hofer, of the Salem Journal, is boosting for Coos County. The "Col." knows a good thing when he sees it, and isn't afraid to say so.

In Western Oregon it is "Coos Bay or Bust," so far as getting any competition with Portland in livestock market, grain market, produce market, or market for anything. Let us all arouse to this fact.—Salem Journal.

Bandon can offer all kinds of inducements to manufacturing enterprises. We have cheap coal and wood for fuel, cheap transportation by water, and at least one railroad coming this way. Now is the time to get in on the ground floor.

Gov. Chamberlain is now making a trip through Klamath County. The Governor called on us in this part of the country a short time ago, and G. Chamberlain, Governor, isn't visiting these is-lated districts simply for a vacation jaunt, either.

There is room on our subscription book for several more subscribers, so if you are not a regular reader of the Recorder call in and get acquainted, and incidentally leave the price of a year's subscription. We are never too busy to write subscription receipts.

On the Exposition Grounds at Portland, there stands a group of buildings that cost \$276,000, that can't be given away. At least no one has offered as much as \$1 for the magnificent structures. The Administration Building sold for \$1,200, and the Mine Building brought \$600.

We will continue to send the Recorder to most of the subscribers now on the subscription book. In case you do not want the paper please so advise this office or your postmaster at once, as we do not want to send the paper to people who do not want it, and it is not our intention to try to force it on to anyone.

A condition bordering on panic prevails in St. Petersburg. Business is completely suspended, and soldiers are everywhere in the streets. Thirty persons were killed and forty were wounded during an encounter between rioters and police at Reval. Provisional Government is being formed by revolutionists at Moscow.

As a result of the recent riot by Greeks in which a woman was killed near Roseburg, because a freight engine bumped into a work train, every caboose on the Southern Pacific has become an arsenal and every brakeman and engine man wears a 44-caliber Colt's revolver strapped to his body. The train crews fully believe that their lives are in constant danger from the excitable and ignorant Greek laborers, says the Eugene Guard.

Our Salmon Industry.

We hear many ideas expressed by fishermen and others in regard to our new fish laws, some taking a stand against such restrictions, which is certainly against our views. It will be remembered that in pioneer days when salmon by the millions were allowed to go to will up the stream to spawn, that all our bays and rivers were a living mass of fish. It will be remembered by a few how Captain Backus, who was the chief workman on the old Panter mill, got vexed at a hand axe with which he was working one day and threw it from the roof of the building into the river, and so thick were the salmon that three were killed by the single blow. In later years, when all fished at will, with all kinds of nets and seines, they were reduced to that extent that they were thought almost destroyed, they being so scarce that it did not justify running the canneries. Since then, with certain restrictions as to the size of mesh allowed in seines, giving one day off in each week, etc., there was in due time a remarkable increase in the run each year. And now, since the government has taken the matter in hand, and well-regulated hatcheries are being established and maintained, still greater will this increase prove. Deputy Warden Smith who was over from the bay lately, informed us that the bay was getting a large run, and that the prospects were good for a profitable season for all engaging in the business, the boats at that time averaging 2000 pounds per night. This, however, has dropped off greatly on account of the rains ceasing. There is no question but if we should get some heavy rains that would swell the streams, the runs in the bay and river both would soon be up to their former notch.

Mr. Smith also informed us that since the hatchery on the bay was established, that but two former seasons would have been effected by the artificially hatched fish, and these two seasons were comparatively expri-ments, and that but a few thousand young fish were successfully and properly "planted," but that since those seasons the numbers have run into the millions, and in future seasons the increase should be more marked.—Coquille Herald.

Coquille.

Mrs. T. F. Tannison and son will visit Bandon, Saturday, to visit relatives and friends.

Robert Burns, the attorney, has concluded to move to Indian Territory, and will offer his household goods at auction next Saturday.

B. L. Harst, a farmer from the Bandon section, was up Saturday and placed orders for fruit trees with agent G. T. Moulton, for himself and others of that neighborhood. Mr. Harst remembered the Herald.

Relatives and friends of W. T. Stone, a former resident of this city, received a telegraph message from his brother, G. T. Stone, who recently accompanied him to Yuma, Arizona, stating he had passed away on Monday morning.—Herald.

Carry County Notes.

Ed Rackleff came down Tuesday and conducted the funeral services at the burial of Charles Gaerra.

An expert mining engineer was on Sixes river last week, examining some placer mining ground along the upper river.

The schooner Berwick entered Rogue river last Sunday evening, and in doing so bumped around on the bar for nearly an hour.

Chinook salmon are plentiful in Elk and Sixes, and the people of this section are having their annual feast on this matchless fish.

Will White passed through town last Friday with four fine rams which his father bought of Frank Langlois, who has some of the finest Cotswold rams in Southwestern Oregon.

Mr. Hurst was in town last Friday, and disposed of a lot of apples and the last of his tomato crop, having sold for the season a ton of tomatoes from a small patch, at two cents a pound.

With the thermometer on the night of the 17th at 32 degrees in Portland, 31 degrees at the Dalles, with killing frosts in the Willamette, and snow in Eastern Oregon, who would not live at Port Orford where the thermometer seldom gets so low as 45 degrees? Extending north and south, with Port Orford in the center, is a stretch of coast line with the most equable climate in the world, and the day is not far distant when this fact will be appreciated, and thousands of people whose business is elsewhere, will have homes here to escape the winters of rigorous climates, and the summers of hot ones.—Port Orford Tribune

The Exact Thing Required for Constipation.
 "As a certain purgative and stomach purifier Chamberlain's Stomach and Liver Tablets seem to be the exact thing required strong enough for the most robust, yet mild enough and safe for children, and without that terrible griping so common to most purgatives," say R. S. Webster & Co., Udon, Ontario, Canada. For sale by C. Y. Lowe, Druggist.

Trouble in Coos.

A terrible war of extermination is being waged among the Coos County papers. Charges of perjury, blackmail, and similar crimes, are preferred with unflinching regularity.

The first extermination to occur is that of the North Bend Citizen, which plant was destroyed by fire. Another paper intimates that the fire was of incendiary origin. At this time, when every section of the state should be showing the attractive side of all matters pertaining to business methods and natural resources, and spreading good literature to bring settlers, the Coos County fight is in bad form. No one will be charmed with a country which the newspaper men represent as overrunning with fire bugs, thugs, and other criminals. If all these things are true, the guilty ones should be brought before the bar of justice and have the usual and fitting sentence passed upon them, and thus rid the community of their presence. If the papers are merely quarreling among themselves, it is time for them to get together and drop personalities which are certain to bring no good to the county.

The little King of Spain is in a hard row of stumps. His mother and the rest of his prompters say he should and must marry, but he is in the same predicament that humbler young men have been in; the girls he can get he won't have, and those he would have won't have him.—Portland Journal.

 Ladies and children's hats made and trimmed to order. Call at residence. Miss Mary Garrison.

Profitable Fishing Season.

Notwithstanding the fact that this fall has not been considered a normal one as regards to weather conditions, salmon fishing on the Coquille has been unusually good and the canneries and fishermen have enjoyed a prosperous season. The canneries were taxed to their utmost capacity, and for a few days were unable to handle the catch. About 17,000 cases have been put up by the two canneries. Some of the fishermen think that if we get rain soon another run will come in, while others think it too late in the season now for much of a run.

No Poison in Chamberlain's Cough Remedy.

From Napier, New Zealand, Herald: Two years ago the Pharmacy Board of New South Wales, Australia, had an analysis made of all the cough medicines that were sold in that market. Out of the entire list they found only one that they declared was entirely free from all poisons. This exception was Chamberlain's Cough Remedy, made by the Chamberlain Medicine Company, Des Moines, Iowa, U. S. A. The absence of all narcotics makes this remedy the safest and best that can be had; and it is with a feeling of security that any mother can give it to her little ones. Chamberlain's Cough Remedy is especially recommended by its makers for coughs, colds, croup and whooping cough. This remedy is for sale by C. Y. Lowe, Druggist.

Man's Unreasonableness
 is often as great as woman's. But Thos. S. Austin, Mgr. of the "Republican" of Leavenworth, Ind., was not unreasonable when he refused to allow the doctors to operate on his wife for female trouble. "Instead," he says, "we concluded to try Electric Bitters. My wife was then so sick she could hardly leave her bed, and five (5) physicians had failed to relieve her. After taking Electric Bitters she was perfectly cured, and can now perform all her household duties." Guaranteed by C. Y. Lowe, Druggist. Price 50cts.
