

As a summer resort there is no equal on the coast north of San Francisco. Bandon is noted for its sunny temperate climate, the most abundant and purest water being less variable than at any other point in the United States. Destructive winds and electrical storms are unknown. Home-seekers will find many opportunities here.

W. J. Bryan will write a series of letters while on his two-year tour in foreign lands. These letters will appear once a week in a select list of the leading American daily newspapers, among which is the Journal.

The Bryan letters in the Sunday Journal will make clear the point of view of foreign countries on many of the questions which now confront us. The Journal is "the paper of the multitude," in sympathy with and pledged to the cause of the masses of mankind—of equal rights to all—of equal opportunity.

J. P. Tupper has purchased the Bullard property, 120x120 feet, north of Harry Baldwin's place. To show that good property in Bandon is rapidly advancing in price, it is only necessary to state that he was offered a substantial increase over the price in a short time after the deal was closed. Mr. Tupper has a deal on for the disposal of his Coquille property, and if the sale is made, he will again become a resident of Bandon.

E. J. Larsen, an eastern man, was in town the first of the week on business. Mr. Larsen is looking for a location for a shingle mill. He has a complete plant of 100,000 ft daily capacity, and will probably locate it somewhere on the Coquille river. Mr. Larsen could not do better than to locate his plant right here in Bandon. There is plenty of Port Orford cedar adjacent to this place, and shingles made from this wood, when a little better known, will be in great demand and will command much higher prices than other shingles.

The schooner Coquille arrived yesterday from San Francisco, and will take out a cargo of lumber.
 This is the vessel in which M. E. Sautert & Co. have lately purchased an interest, and the craft will load at their mill. The schooner is under the command of Capt. Wetzel, formerly master of the Bender Brothers, and well known here.
 The Coquille will probably be steadily employed now in the lumber trade between the Sinalaw and San Francisco. We are glad to see our mill owners investing in vessels as this gives them better opportunities for shipping lumber.—Florence West.

San Francisco, Jan. 15—The stmr Dirigo, which sailed from Olympia, Wash., seven days ago with a cargo of lumber, arrived here today disabled and in tow of the steamer Shasta.
 The officers of the Dirigo tell a story of terrible experiences at sea and narrow escape from total wreck, which inevitably would have been attended with loss of life. Thursday, when the vessel was 150 miles south of Cape Blanco, she ran into a heavy southeast gale which threw her on her beam ends and damaged her rudder. About 100,000 feet of lumber was washed overboard, and only by clinging to the rigging did the crew escape a similar fate. The strain on the steamer caused her to spring a leak, and soon the hold was partly filled with water. She was kept afloat during the night, and on Friday was sighted by the Shasta, which succeeded in getting out two lines and bringing her to port.

The Dirigo is owned by the Puget Sound Navigation Company of Port Townsend.

The rate from Portland to Yaquina Bay and Coquille River points is prohibitive for Portland merchants, and a company will be organized to operate steamers between Portland and those points. The rate given by the Harriman lines is \$6 from Portland to Yaquina Bay, and only \$4 from San Francisco to the same point. The new company will make a \$4 rate from Portland, and Portland business men will be able to compete with merchants from the Bay City.—Portland Telegram, Jan. 10.

Coquille-Bandon Mail Schedule.

Sealed bids will be received until Feb. 6th for carrying the U. S. mails for the term from July 1, 1906 to June 30, 1910, on the following described route by the schedule stated, or such other schedule of like running as the Post master General may prescribe: From Coquille by Lampa, Parkersburg, Prosper and Bollaards to Bandon, 23.50 miles and back, seven times a week. The schedule is described as follows:
 April 16 to Oct. 15 of each year
 Leave Coquille daily at 7:00 a.m.
 Arrive Bandon " by 12:00 m.
 Leave Bandon " at 1:00 p.m.
 Arrive Coquille " by 6:00

Oct. 16 to April 15 of each year.
 Leave Coquille daily at 1:00 p.m.
 Arrive Bandon " by 6:00 p.m.
 Leave Bandon " at 7:00 a.m.
 Arrive Coquille " by 12:00 m.
 It will be noted that the above schedule will give Bandon a much better mail service. Through the efforts of the Bandon and Coquille Boards of Trade, the Roseburg-Myrtle Point mail route was extended to Coquille last year, but the bids last fall for carrying the mail under the old schedule were rejected. Now bids are asked for the Coquille-Bandon schedule with a seven day service instead of six, and there will probably be some competition for the business.

Moffat Road is Coming to Coast.

Denver, Jan. 6.—David H. Moffat, who is building a railroad through Northern Colorado and Utah to Salt Lake, today made the following announcement:
 "I intend to extend the Denver, Northwestern & Pacific railroad to Portland, Or. I want to get up into that section for the timber as well as an outlet to the Pacific ocean. I will begin the extension when I am through to Utah."
 The foregoing Associated Press dispatch is interesting to the people of this section. While Mr. Moffat has stated that he intends to build to Portland, this is taken to also include Coos Bay.
 It is pointed out that years ago when Moffat was President of the Rio Grande, that he made a reconnaissance for a railroad by way of Klamath Falls and through Diamond Lake pass over the same route taken up by the Southern Pacific.

It is said that the haste of the Southern Pacific to occupy this territory was caused by the preparations of other lines to enter Oregon. This Moffat road may have been one of them.
 If it is timber Mr. Moffat is after he can not afford to overlook the Coos Bay country. If it is a deep-sea harbor on the coast that is his principal object, he will find a depth of forty feet at Coos Bay. If this is all that he seeks he can save at least a hundred miles in distance.
 We must believe that the Colorado magnate has Coos Bay in his mind for his Pacific terminus. If he hasn't then the Chamber of Commerce should lose no time in laying before him our advantages. This is an important matter and should be taken up at once.—Harbor.
