The improvement crusade against sidewalks and the weeds is already gaining great popularity among our townsmen, probably not so much among some that have to "dig up" as to others, but honestly, now don't you think the streets on the hill look a hundred per cent better for the money put into them.

Mrs. Prewett, of Parkersburg, has strawberries that measure five and one half inches in circumference, and picks them by the gallon that are five and a little over, and yet we cannot raise anything in this country. They have green corn on their place that is six feet high, and nearly ready to eat.

Some mouths look like peaches and cream, some like a hole chopped into a brick wall to admit a door or window. The mouth is a hot bed of toothaches, the bung hole of oratory, and a baby's crowning glory. It is patriotism's fountain head, and the tool chest for pie. Without it the politician would be a wanderer on the face of the earth, and the cornetist would go down to an un-honored grave. It is the grocer's friend, the orator's pride, and the dentist's hope. Ex.

Wouldn't it jar you to have a man stop his paper when you had sent it to him for a couple of years, by refusing it at the Post Office. These little newspaper statements that we send out every so often shows up a man's character in great shape. It is just as dishonest to subscribe for a paper and refuse to pay for it as it is to beat the butcher or grocer out their accounts. Some people think a good way to get out of paying their paper bill when leaving town, is by not coming around to have their address changed, and just such people remind us of a cheap automobile, they always leave a smell behind that is remembered for a long time.

### Dorris Not to Blame.

in charge of the remaining buildings during his absence in San Francisco. The wearing apparel for the Daisy was returned to San Francisco on this last trip of the Elizabeth where it will be used on another vessel.

Another incident in connection with the fire that has been circulated by some miscreant throughout the country and has been published in the Times at Marshfield, is the report of the safe burning up with the money of several of the employes. The safe was in the office, which was not even scorched, not being close to the shipyard. The report was to the effect that the ship inspector had something like \$1600, and Walter Greenough, who was employed on the job, and had \$800 in the safe, which was so badly burned as to destroy all traces of the money. This is absolutely without foundation. There was never practically any money in the safe at any time, and none the night of the fire. All of the employes were paid by checks on the local bank here, and there was no necessity to keep any amount of currency at the yard. This report was started at Marshfield, probably told to some reporter that was looking for a story and to all evidences, he found one. It is just such little prevarications that hurt, and Mr. Price is showing that you can't keep a good man down.

He will finish his business relations with the underwriters this week in San Francisco, and we may look for him on the next Elizabeth. He has decided to rebuilt, but not as to the location. He has been offered the site near the Cody Mill, but he favors the old site, Pleasant Harbor, where the building will be more or less sheltered from the North Wind. It would be necessary to drive a large number of piling at the Cody site to make it available for a shipyard, and it will take him some time to get it in readiness.

Mr. Price is insured by two companies, who had their agents here last week to look over the loss. They gave it as a total loss, and he will no doubt receive his insurance, which amounts to something like \$6500. This will give him a start and he will get the glad hand from all of this community of boosters who want to see him locate here. He is a gentleman, and has made a large number of friends here who want to see him succeed in his enterprise, and heres hoping he will stay with us.
